- ① Tweezers: for small clips material
- ② Scissors: used for cutting
- ③ Ruler: used to measure material size and identification material number
- ④ White latex: used for bonding materials, dry slowly, easy to modify
- ⑤ Alcohol / U glue: mainly used for the bonding of small objects, dry faster easy to stick
- ⑥ Brush: Mainly used for glue application, the brush can sweep the glue evenly
- ⑦ Utility Knife: Mainly used to cut the hole position of the sticker (such as window hole position, door hole position,.)

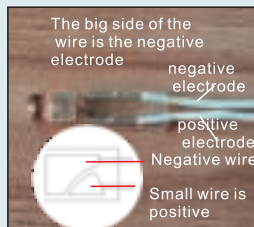

Battery case · Extension cord and battery case installation method

① Remove the battery box, LED lights, extension cords, tools: self-adhesive cloth, two batteries (battery-owned)

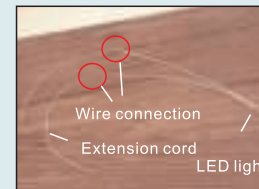

② Put the battery into the battery compartment, pay attention to distinguish between positive and negative

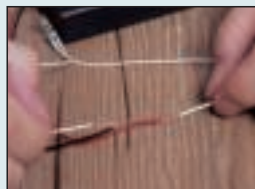

③ Distinction between positive and negative of LED lights

④ Scrape the edge rubber on both sides of the cut wire to expose the wire about 0.5-1cm

⑤ Connect the extension cable to the LED light wire separately (without the positive and negative electrodes, the wire is wound together)

⑥ Connect the positive pole of the LED light to the red wire of the battery box and the negative pole to the black wire

⑦ Battery box and LED bulb wire connection completed

⑧ Open the battery compartment switch and test

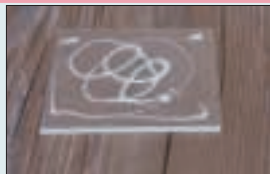

⑨ Finally, attach all the wire connections to the sticker to prevent short circuit

SKILLS

Paper paste method

1.Remove the bottom plate and paper accessories
Tools: white latex, ruler,brush

As shown apply white latex on the bottom plate

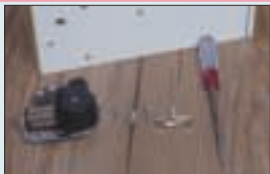

Apply white latex evenly with a brush
3

Align the bottom plate and press the paper. Adjust position before drying out

Music place method

(the movement is need to buy it sperately,if not, pls skip it, it will not affect)

①Take out the music movement, 3 screws, 1 spring, screwdriver

②Place the music movement in the position of the manual and screw on the screw

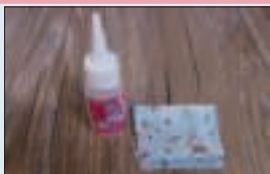

③Tighten the 3 screws and the spring; the music movement is installed

④Rotating the spring, the music movement can emit beautiful melodies

Pillow making method

①Cut the right size fabric.
Required tools: glue, cotton

②Fold the fabric in half, facing the outside, that is, the pattern is facing in, no pattern is facing outwards

③Gluing the edges of the fabric with glue (Leave a small mouth plug cotton into it)

④The red line as shown in the figure indicates the glue bonding position.

⑤ Use the tools such as tweezers to reverse the pillow and have a pattern facing outwards

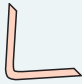

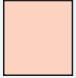

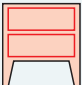

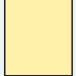

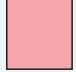

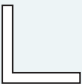

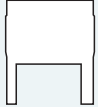

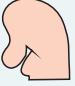

⑥Put a small amount of cotton from the small mouth that is left

⑦Glue the small openings left with glue

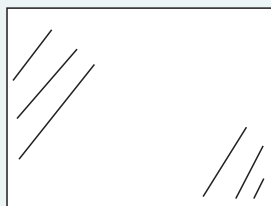

⑧Pillow making is completed
