

Follow all special requirements on packaging and labelling when transporting batteries by a third party. Ensure that no batteries can come in contact with other batteries or conductive materials while in transport by protecting exposed connectors with insulating, non-conductive caps or tape. Do not transport batteries that are cracked or leaking. Check with the forwarding company for further advice.

### KNOW YOUR PRODUCT

See page 109.

1. Battery port
2. Lock-off button with unlock
3. Handle, insulated gripping surface
4. Spindle lock button
5. Lock-off button with lock
6. On/off switch
7. Side handle
8. Guard lever lock
9. Wrench
10. Toolless grinding guard
11. Locking flange
12. Toolless cutting guard attachment
13. Grinding wheel
14. Backing flange
15. Spindle shaft
16. Operator's manual
17. Cutting Disc
18. Battery pack
19. Charger

### MAINTENANCE

- The product should never be connected to a power supply when assembling parts, making adjustments, cleaning, performing maintenance, or when the product is not in use. Disconnecting the product from the power supply will prevent accidental starting that could cause serious injury.
- When servicing, use only original manufacturer's replacement parts, accessories and attachments. Use of any other parts may create a hazard or cause product damage.
- Do not at any time let brake fluids, gasoline, petroleum-based products, penetrating oils, etc., come in contact with plastic parts. Chemicals can damage, weaken or destroy plastic which may result in serious personal injury.
- Avoid using solvents when cleaning plastic parts. Most plastics are susceptible to various types of commercial solvents and may be damaged by their use. Use clean cloths to remove dirt, carbon dust, etc.
- For greater safety and reliability, all repairs should be performed by an authorised service centre.

### SYMBOLS ON THE PRODUCT

Safety alert
