### High power, suitable for two pans

Using 800 and 1200 watts of power, these luxurious ceramic plates can heat up very quickly, so you won't have to wait long before you can start cooking. You can also use this ceramic plate to cook big portions, as pans easily fit on the plate's diameters of 16 and 19 centimetres.

### Easily regulate the temperature

Fine tuning the temperatures has never been this easy thanks to the thermostats equipped on this hot plate with stepless temperature regulators. You also do not have to worry if you do accidentally overcook something. When the hot plate gets dirty, it is very easy to clean because the hot plate comes equipped with safety glass.

### Safe, complying with CE standards

This hot plate complies with the new CE standard, which means it is safe to use according to European standards and does not pose a threat to your health or the environment. In addition, the device has an automatic shut-off system and a power cord of 0.8 metres.
