Instruction

## Instructions

- 1.-For an optimum protection, the helmet should fit perfectly to the user s head, choose the size which best adapts to your necessities
- 2.-Once the helmet is adjusted:
  - The straps should form a "Y" forward of and below the ears, just like the figure indicate (the straps may not cover the ears)
  - The fastening system should be maintained under your chin
  - The helmet should be kept fastened on your head making sure the helmet cannot be removed from your head or rolled forward or backward excessively
  - You should have covered the forehead and the nap of the neck, just like the figure indicates, in a way that they are protected and the helmet dose not block your vision
- 3.-It is necessary to replace the helmet in the next situation, which can damage the integrity of the helmet or its materials
  - After receiving a strong impact due to an accident (even if you do not observe any damages there can be an internal one)
  - After the helmet has been in contact with solvents or other products that attack the materials of the helmet
  - After the helmet has been exposed to temperatures exceeding 60°C
  - After a few years of careful use
- 4.-For cleaning use a soft cloth, mild soap and water only
- 5.-The use of pieces which are not recommended by the manufacturer of changes to the helmet can seriously damage the protection capacity of the helmet
- 6.-No helmet can protect the user against all kind of blows or unexpected impacts

How to wear it:

- ◆ Ensure that the helmet brings your head slight pressure and is positioned horizontally on the head which make it higher than your eyebrow and ear. Safety problems may happen if the helmet is not wore correctly, Make sure all the parts are in correct position
- ◆ Adjust the strap so that it fits snug under the chin. When the strap is adjusted properly and buckled. It should hold the helmet firmly in place. The strap forms a "Y" under the ears, and must be closed under the jaw and on the side of the neck. Make sure the strap is back against the throat, and NOT placed on the point of the chin. If you open your mouth and feel a slight pressure from the chin strap, the helmet fits well. Any slack in the strap must be pulled through the chin buckle. The loose ends of the strap must pass through the rubber "O" ring on the strap

"This helmet should not be used by children who climb or practice other activities which imply a risk to the child of falling or of remaining hanging when the child is trapped by the helmet"

This product satisfies the regulation: **EN 1078**
