FOCUS EARPLUGS

REDUCE DISTRACTION

All sounds above 50 decibel have a serious impact on concentration and well-being (a normal conversation is around 60 dB). These distractions can cause fatigue and concentration problems. Shush Focus helps you improve focus and increase productivity, while still being able to communicate with co-workers.

IMPROVE FOCUS

Being surrounded by sound all day takes a lot of energy. Shush Focus reduce noise pollution by 24 decibels. Minimizing distraction will increase productivity and decrease stress. Attention span will increase and at the end of the day you will be less fatigued. Wearing Shush Worker all day.
