DRAUPNIR

L33T-Gaming is proud to present Draupnir from the top series Odin, a pro gaming mouse with 2.4 ghz wireless technology & wireless Qi charging functionality.

Draupnir is packaged with a ton of features to meet the requirements from true pro gamers. The ultra-sensitive Pixart™ 3389 sensor delivers amazing 16,000 DPI and insane 50G acceleration to ensure both speed and precision - while the critically acclaimed Omron™ switches ensure stability while gaming and a long product lifetime. Draupnir is a first-person shooter mouse, built with the best materials available, in order to resist the rough use from experienced gamers. The 8 fully programmable buttons + the exchangeable thumb clutch (three included) will give the user the best opportunities of getting comfortable & effective while gaming.

Feel the freedom and benefits of the 2.4 Ghz wireless technology without compromising the quality and the gaming experience. Once the built-in battery runs flat, simply charge it using the wireless Qi technology - or continue gaming uninterrupted while charging the mouse, attaching the included super soft braided USB-C to USB-A cable to your computer.

Personalize & customize all settings from the software, whether it's the built-in RGB light or special macros - Draupnir will do the job and store up to 5 direct-selection on-board user profiles, with full personalization.

Draupnir comes in a luxury hardcase storage packaging.

GUNGNIR

L33T-Gaming is proud to present Gungnir from the top series Odin, a pro gaming mouse with state-of-the-art technology.

Gungnir is packaged with a ton of features to meet the requirements from true pro gamers. The ultra-sensitive Pixart™ 3389 sensor delivers amazing 16,000 DPI and insane 50G acceleration to ensure both speed and precision - while the critically acclaimed Omron™ switches ensure stability while gaming and a long product lifetime. Gungnir is a first-person shooter mouse built with the best materials available, in order to resist the rough use from experienced gamers. The 8 fully programmable buttons + the exchangeable thumb clutch (three included) will give the user the best opportunities of getting comfortable & effective while gaming.

Personalize & customize all settings from the software, whether it's the built-in RGB zone light or special macros - Gungnir will do the job and store up to 3 direct-selection on-board user profiles, with full personalization. A quick access 3-step polling rate selector is located underneath the mouse, which allows the user to adjust the polling rate from 250 - 1.000 Hz.

Gungnir comes in a luxury hardcase storage packaging.
