

1. Data collected by the device

Types of data: Image/video files, EXIF metadata, sensor data, location data (GPS/geotag), device info, usage data, battery & system data.

Collected continuously? No

Collected in real-time? Yes

2. Data format and size

Approximate data size: Unknown (depends on photo/video resolution and usage).

3. Data storage

Stored locally? Yes

1. Data collected by the device

What types of data does the device collect? (e.g. usage data, sensor data, location, etc.)

A : Image/video files, EXIF metadata, sensor data, location data (GPS/geotag), device info, usage data, battery & system data.

Is data collected continuously? (yes/no)

A : NO

Is data collected in real-time? (yes/no)

A: yes

2. Data format and size

In what format is the data stored? (e.g. JSON, CSV, other)

A : Storage format: JPEG, , MP4, format.

What is the approximate data size per device/user? (e.g. X MB per month or unknown)

A : Unknown (depends on photo/video resolution and usage).

3. Data storage

Is data stored locally on the device? (yes/no)

A: YES

Is data stored on external servers/cloud? (yes/no)

A: NO

How long is the data stored/retained?

A: Until user deletes it; no fixed automatic expiration.

4. User access to data

Can users view/access their data? (yes/no + how, e.g. via app)

A: YES (via camera playback, computer, or companion app)

Can users download their data? (yes/no)

A: YES

Can users share their data? (yes/no)

A: YES

Can users delete their data? (yes/no)

A: YES

Through which method can users manage their data? (e.g. app, account, support)

A: Camera menu, computer connection, companion app.
