

INSTRUCTION MANUAL

Professional Photo Studio Box

Ideal for photography of small to large sized objects

1

Instructions for use

1. Unveil the velcro on one end of the photo studio

2. Stretch the small "ear" in the corner of the inner side outwards

3. After the opening, the studio body installation can be roughly completed

4. Make the black hooked rod stuck in the bottom of the studio

5. The light panel adopts a rotating design, which can be stuck in anywhere in the studio body

6. The light board can be fixed on the iron frame of the shed and can be rotated and polished. The power cord can be pulled out from the top exit

7. Turn on the power

8. The power supply can be rotated to adjust the brightness
