1. Short press Key 1 for 2 times, power on flashlight. Short press key 1, power off it.
2. Slide screen find the surface of flashlight , click it enter into it, you can choose On or Off.

Key 1

Flashlight

## **10: Location**

- 1: Turn on the watch and make sure that it got signal
- 2: Open the map on APP, click the location then it will shows your baby's real-time position.

Notes: If the watch is indoors, it usually position yourself via LBS, and the deviation is inevitable, which depends on the distance between the watch and Base Station and the environment as well. If you're in outside,, it switch to GPS automatically, the range of deviation will also narrowed, but will still become unstable while the watch moved, which is normal, you can't regard it as quality issues, won't be listed in After-sale service.

## FAQ Center

---

Few points need to be confirmed about the SIM card

- 1: Has GSM Network(Telecom can not support)
- 2: Has 2G data base
- 3: Can show callers ID

## FAQ Center

---

### **1.Even if you inserted the SIM card, it still got no signal**

- 1): Check the card's type and size to see if it's right, also check if the card has 2g network.
- 2): Check the card to see if it's inserted properly. First shut down the watch, second, insert the card, then reboot.

### **2.When you save the numbers it indicates that the device can not connect the network.**

- 1): Is there any signal after inserting the card, please check, and can the watch rings when receiving a phone call.
- 2): Check whether the watch is on or not.(before using the APP, the watch must be on)

## FAQ Center

---

- 3): Make sure that the SIM card has the data package and make sure you have paid the phone charge and the SIM card is available to call.
- 4): Check whether the watch ID match the ID on the tags or not.
- 5): If still not working, please send pw,123456,ts# to the number that inserted in watch, then your phone will receive a message from your watch, please send the message and the rear cover of the watch to your local dealer, they will solve this problem as soon as possible.

### **3.When you call the watch, it reminds you the number you have dialed is busy, please try again later.**

- 1): Is there any signal after inserting the card, please check.
- 2): Please check you have saved phone numbers on your APP.
- 3): Check If you have turn on the DO NOT DISTURB in App and set a time, if yes, please switch to OFF.

**4.The time can not update automatically.**

When you manage inserting the card(must have data ), the watch will update the time automatically, which might take few minuets. If not, please send  
pw,123456,ntpserver,121.43.19.219,8089# via your phone to the watch, once your phone got answer, reboot the watch.

**5.The positioning function is not working.**

- 1): Go outside and try again.
- 2): Once the watch goes to SLEEP MODE, it will switch to SAVE POWER MODE, which means the function of uploading data is OFF, at this time, you can refresh the positioning and shake the watch to wake it up.

**6.Neither charge nor boot**

The battery enter into a self-protection mode, do as the following step by step:

- 1): Try another USB Cable to see if the original one was damaged.

- 2): Press the POWER key for 50 seconds, then recharge, it will indicate recharging on the watch after 1 minutes, at this time you can reboot.
- 3):If still not working, the watch has a recovery time, after two days, it has no power and then recharge it ,it should be work.

**7.No voice on watch or phone.**

- 1):Check the volume + - while calling. If the watch switch to max. still no voice, the speaker must damaged, it need be repaired.

**8.The watch can receive any call**

Apply to your local operator for a function of showing callers ID

**9.When use the watch to call, it indicates that can not connect**

Check the GSM signal, it shows on the screen. If not, maybe your SIM card has loosened, try to reload again.
