

- Memory stores the latest measured data values
- The software set automatic alarm values
- °C/°F value unit conversion
- Backlight LCD display

## SPECIFICATIONS

Measurement model: Non-contact infrared temperature measurement

The measurement distance: 1cm ~ 5cm

Temperature measurement range:

32°C~43°C(89.6°F~109.4°F)

Temperature resolution: 0.1°C or 0.1°F

Power supply: DC3.0V(AAA\*2 battery)

Automatic shutdown time: about 30 seconds

Electricity prompt:

2.4V±0.2V(voltage at low voltage prompt)

Size: 155mm X 40mm X 38 mm

Net weight: about 66g(without batteries)
