VIP PLATINIUM MATTRESS

CoolGel Bamboo-Charcoal Viscoelastic Memory Foam & GreenTea infused HR High Resilient Cold Foam, Zero Motion Transfer, Pressure Relief, 7-Zone Ergonomy, 6 layers, 27cm thick, Engineered in Belgium"

Our mission: At VIP Sleep, with our experience in mattresses and sleeping, for more than 50 years in Europe, we aim to bring deeper and better sleep to people's life.

A Healthy Deep Sleep is ensured with a VIP welcome for your body

For a healthy sleep, your mattress should sufficiently support your natural anatomic position, while gently conforming every curve of your body.

The VIP PLATINIUM was born from our innovative CoolGel Memory foam enriched with Bamboo-Charcoal ions which carefully molds to the shape & curves of your body like a cocoon. In each of your sleeping positions including side-sleep, back-sleep, stomach-sleep or front-sleep, The VIP PLATINIUM cocoons you without excessively sinking; and guarantees an optimal elasticity to provide a comfortable support for the natural anatomic position of your spine by the help of our other innovation GreenTea infused HR-High Resilience Cold Foam. As a result of these, VIP PLATINIUM is soft enough to respect the morphology of your body while ensuring a good support for your back and entire body.

The VIP PLATINIUM has 7 ergonomic zones holding your body with respect to its weight allocation. Each of the 7 zones of your body are supported individually in well-balance.

Pressure Relieving VIP PLATINIUM converts the extra pressure at certain points into a fulfilling gentle cocoon feeling to provide you a deeper sleep. As a result, 6 layers of comfort and 7-zones of ergonomics are specially engineered in Belgium to bring you the best sleep.

Thanks to Zero Motion Transfer: When you sleep on VIP PLATINIUM, your turn & toss movements will never disturb your partner in the bed. Because The VIP PLATINIUM has a top level of Point Elasticity to absorb your movements and avoid your them disturbing your partner sleeping next to you. That's the perfect sleeping independence allow everyone to make their place on the mattress according to his/her own morphology without disturbing or being disturbed by the partner.

Thanks to the well-engineered product design of the VIP PLATINIUM which brings you a very quiet and silent mattress.

An innovative solution against perspiration: The innovative TempéNature nanotechnology CoolGel with blue drops applied to the top layer regulates your body temperature, thus preventing excess perspiration and providing ideal freshness for your body during sleep. Perhaps that means a better sleep quality.

Bamboo-Charcoal ions inside the CoolGel against microbes and bacteria

To fight against these invisible enemies, we have infused bamboo-charcoal ions into our innovative Cool Gel, known for their anti-allergic, anti-bacterial and anti-stress properties. By the help of bamboo-charcoal enrichment, your sleep will be cleaner, more hygienic and healthier than before.

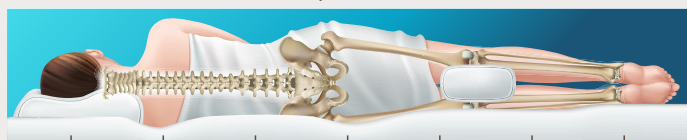

Ultra-breathable: Ventilation channels and open cell foams used in ultra breathable VIP PLATINIUM ensure a top level air circulation in order to help avoiding moisture, minimizing mite formation, better thermoregulation and bringing a long lasting hygienic product life.

Adjustable and Stable mattress with Anti Slip feature

The VIP PLATINIUM is a mattress fully compatible with all types of beds, slatbases and boxsprings including the electrical and adjustable versions.

Anti-slip cover at bottom helps that your VIP PLATINIUM mattress stays stable and coherent to your bed surface and never slides away.
