

1. Safety Precautions

This product complies with the requirements of the following directives of the European Union for CE conformity: 2014/30/EU (electromagnetic compatibility), 2014/35/EU (low voltage), 2011/65/EU (RoHS).
Pollution degree 2.

To ensure safe operation of the equipment and eliminate the danger of serious injury due to short-circuits (arcing), the following safety precautions must be observed.

Damages resulting from failure to observe these safety precautions are exempt from any legal claims whatever.

General:

- Read these operating instructions carefully and make them available to subsequent users as well.
- It is essential to observe the warning notices and labels on the device, do not cover or remove them.
- Pay attention to the use of the device and only use it in a suitable overvoltage category.
- Familiarize yourself with the functions of the device and its accessories before you carry out the first measurement.
- Do not operate the measuring device unsupervised or only protected against unauthorized access.
- Use the device only for the purpose of its intended use and pay particular attention to warnings and information on the maximum input values.
- Improper use can overload the device, which can destroy or overheat the device. There is a risk of considerable damage or fire.

Electric safety:

- Voltages above 25 VAC or 60 VDC are generally considered dangerous voltages.
- Work on dangerous voltages may only be carried out by or under the supervision of qualified personnel.
- Wear suitable protective equipment when working on dangerous voltages and observe the relevant safety rules.
- Do not exceed the maximum permissible input values under any circumstances (risk of serious injury and / or destruction of the device)
