1*Cymbal

2*Drums

2*Drum Table Feet

Instruction manual: How to assemble the drum kit.

Slot the music table into the corresponding hole of the table foot, so that the two feet are facing downwards.

Place the green wooden plug between the music table and the top half of each foot to fix the feet securely.

Note: Push the plug in parallel slowly but firmly to ensure that the table and foot are fixed.

Open the cymbal stand anticlockwise. Place one of the washers between the stand and the hole on the back of the cymbal, then screw it in clockwise, ensuring there is some space between the cymbal and the washer.

Then screw the stand clockwise into the right hole of the square music table.

Find the wood tone block and the remaining washer.

Place the washer on the screw, then screw in the wood tone block so that the washer is between the hole on the left of the square music table and the wood tone block.

Screw the wood tone block into the square music table.
Note: Do not screw too tightly.

Next, place the two drums face into the two large holes on the music table.

Finally, insert the wooden sticks into the two holes provided underneath the square music table. Now you can create your own music!
