SAFETY PRECAUTIONS

Read these safety instructions before using your device and store them for possible future reference.

- ❖ If the cord is damaged, have it repaired by the manufacturer, its service or a similarly qualified person in order to avoid any hazard.
- ❖ The cord should always be readily accessible.
- ❖ The apparatus shall not be exposed to dripping or splashing of water or liquids and that no objects filled with liquids such as flowers vases shall be placed on the product.
- ❖ The normal ventilation of the product shall not be impeded for intended use.
- ❖ Always leave a minimum distance of 10 cm around the unit to ensure sufficient ventilation.
- ❖ Open flame sources, such as candles, should not be placed on top of the device.
- ❖ The device is intended for use only in a temperate climate.
- ❖ The ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, table-cloths, curtains, etc
- ❖ **CAUTION:** to avoid accident, this appliance must be fixed properly on the floor or on the wall according to instructions for installation.
- ❖ **CAUTION:** Danger of explosion if batteries are incorrectly replaced or not replaced by the same type or equivalent.
- ❖ Don't look straight into the light from the projector lens.
Direct burst of intensive light can harm your eyes and cause severe damage to eyes of infants.
- ❖ **INTERFERENCE All wireless devices are susceptible to interference which may affect their performance.**
- ❖ **AUTHORIZED PERSONNEL Only qualified people are authorized to install or repair this product.**

-
- ❖ **ACCESSORIES** Only use batteries, chargers and other accessories which are compatible with this equipment. Do not connect incompatible products.

| ⑨ Speaker | ⑩ Ventilation Outlet |

• Remote Control

Note: While using the remote control, point it toward IR receiver.

Installation And Mounting

Before using your device, select an appropriate spot for the projector, Brightness of the room is crucial to quality of the image projected, Reduce the external brightness Follow instructions and hints below for optimum usage.

► **Projection Distance and Size**

(Aspect Ratio: 16 : 9, Default)

Please follow the data in chart below, to adjust the image size and the distance.

Distance provided is measured from lens to projected surface.

Projection size	50 inch	72 inch	100 inch	120 inch
16 : 9	1.50 m	2.10 m	2.90 m	3.35 m

The image size depends on the distance between projector and screen, there may be 3% deviation among above listed data. Different settings cause various distances.

► How to Use

① Before starting up the projector. Follow figure below to adjust trapezoid correction. Keep the projector vertical with projector screen and keep it on the same level.

For Ceiling Mount : Select display image rotation, options available are : front (on desk), rear, front / ceiling, rear / ceiling, see picture below: Before that. You needs compatible mount, and for rear projection, it required a special projection screen.

Ceiling mounted (upside down)

Table mounted

② Connect the power plug as following picture, connect with the electricity, The indicator light will turn to red.

Note: Pictures are only for your reference, different countries got different power plug, please contact your supplier for more details, better connect the projector first.

③ Connect the power cable to the projector and into the power supply socket, the indicator light will turn red, then the projector is in standby mode, take off the lens cover.

Press the “ power ” button () on the control panel or remote control to turn on the projector.

A. On the control panel

B. On the remote control

Note: do not guarantee compatibility with every external device !

④ Keystone and Focus

A. If the projected image is in a trapezoidal shape, it can be resolved by Keystone correction. (Do Manual Keystone Correction)

Note: If the Keystone correction fail to resolve image shape, please reduce the vertical height of the projector in relation to the center of the screen.

B. the projected image may be blurry or difficult to see, this is due to lack of Focus adjustment with the lens, please follow the processes below to adjust the Focus. (Do Manual Focus, find the most sharpness picture on the screen)

Note: It is normal when sharpness in the central, blur in the edge.

⑤ Multimedia Connection:

A. Insert the USB flash driver into the USB port and choose the right signal source, then press Play / Pause button (▶||) to display or stop.

(Press “ Source” on the remote control or “ S” on the control panel, then there is “ Input Source” on the screen, choose “ USB “)
