

## DesignNest vision

DesignNest is a one-stop platform for designers to launch their products worldwide, for retailers to order innovative products for their stores and for consumers to afford these designs from authentic designers.

Make product design accessible and affordable for everyone.

Creating an end-to-end platform for funding, engineering, manufacturing, marketing, sales and fighting copycats - serving designers, retailers and consumers.

Imagine a lamp, that's powered on by a gravitational pull. This is what the award winning Heng Balance Lamp is all about. The two round cores at its center turn on the light when levitating in mid air. When you bring the 2 round cores together, they will remain suspended and the lighting element embedded in the frame will light up.

Light: 1LED strip, 2700Kelvin,  
warm white  
Magnet: Neodymium  
175lm 5W

### Warning!

The Heng Balance Lamp is USB powered,  
use a certified 5V DC adapter to power it.
