

MONIMOTO 7 SMART GPS TRACKER

We've all been there. The weather is nice, you go out for a ride, park your bike and go for a meal or coffee. Everything's perfect but something is worrying you. Right - theft.

Monimoto is run by motorcycles and powersports enthusiasts having expertise in electronics. Monimoto 7 is a brand new Monimoto model. This little guy is a big trouble for bike thieves. Monimoto device is a smart anti-theft GPS tracker for motorcycles, scooters, ATVs, UTVs and powersports. The new Monimoto version is even smaller, easier to install and compact. Monimoto 7's GPS head has been improved so that motorcycles' locations may be found also indoors, not just under clear skies.

It uses the LTE-M (LTE Cat-M1) network that works internationally and doesn't drain its wireless battery. It is powered by 2 long-life batteries, so even if the vehicle's battery is dead your ride will still be safe. Even better, thieves won't be able to find and disconnect any wires because there aren't any! Monimoto comes with an embedded international eSIM card with 2 months FREE subscription.

HOW IT WORKS?

When the Key Fob leaves your ride (~30 m), the tracker arms, ready to detect any movement. As soon as movement is detected, the tracker immediately checks for a nearby Monimoto Key Fob - if it detects one it will assume that it's the owner and disarm itself. If it does not, the tracker springs into action calling your phone in under 50 seconds. Shortly after the call, constantly updating GPS coordinates will be made available to you through the Monimoto app.

FEATURES:

- Easily installed / swapped from one bike to another
- Easy to use everyday w/ daily location notifications with customizable frequencies
- Completely standalone via 2 long-life batteries that can last more than 1 year
- GPS location updates every 5 minutes when the device is in motion or every minute if live tracking mode is selected
- Automatically arms itself when you leave your vehicle
- Disarms when it detects a nearby paired Key Fob, no unlock buttons needed
- Monimoto and the Key Fob both meet IP65 standard, meaning they are protected from dust and water
- Everything can be controlled via the Monimoto app on any iPhone® or Android® device
- Includes releasable plastic zip ties for easy attachment to motorcycle frame or secure part
- International embedded eSIM card w/ 2 free months of GSM service included (€36/year after that, paid yearly through the Monimoto app)
- Works internationally with LTE Cat-M1 and 2G network connectivity
- Support available directly through the Monimoto app
- Doesn't affect the vehicle's warranty
- Manufactured in Europe with highest quality standards
- 2 years warranty

PRICE

€199.00

€36/year E-SIM
card subscription

First 2 months for **FREE**

NOTE:

This tracker is not designed to be called actively / used to keep track of trips since tracking is only activated when the paired Monimoto Key Fob is out of range. Some hard to reach areas such as mountains, heavily walled garages, etc may not have coverage. Be sure to install / place the tracker correctly via Monimoto's guidelines and run a test before putting it into everyday use.

MONIMOTO 7 VS. MM6

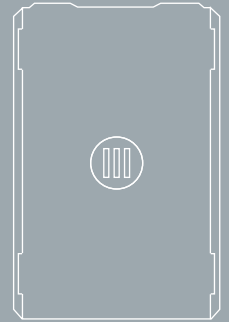

MM6

MONIMOTO 7

SHAPE	Longer	Thinner, smaller than previous version
WEIGHT	104g (3.7 oz)	95 g (3.35 oz)
