exposition to air, becoming dark in a more or less uniform way. This can happen also as a consequence of the contact with some foods. It is a natural process which does not damage the silver deposit but alters its look. The silver coat must be polished in order to restore the original state with good silver polishing products. Please make sure these products have to be diluted in warm water only.

Collection Name

Flat - *Flat collection expresses the perfect match between great personality and minimal style. The wide and bright surfaces of the handles give importance to every tabletop. Timeless cutlery, guaranteed by the Sambonet quality and tradition.*
