

Data Usage Information

Product: Drone with Wi-Fi FPV Camera

This product does not collect, store, or transmit personal data to the manufacturer or any third party.

The Wi-Fi connection created by the drone is a direct local connection between the drone and the user's mobile device. This connection is used solely for the live video feed and flight control.

The product does not require a user account, cloud services, internet transmission, third-party sharing, or analytics/location collection.

Photos and videos are stored only by the user, depending on the settings of the mobile device or storage medium used. The manufacturer does not have access to these files.
