MAINTENANCE AND CARE:

- When cleaning, please keep unplug and cool
- Periodically examine the air intake filter screen on the back of the brush and remove debris that had accumulated which may reduce air flow and damage the brush
- Never use the following chemicals to clean the product: dilutes, gasoline alcohols, or any other flammable chemicals
- Do NOT wrap the cord around the brush which may result in worn-out cord.
- Use a soft dry cloth to clean.

OPERATING INSTRUCTIONS:

- Check the voltage on the rating label to ensure if it corresponds to your local voltage before plugging in
- The brush is equipped with three heat setting-Low, Middle and High. It is also equipped with a off switch. As a general guide, use the high speed setting for rough drying for thicker hair, and the middle setting for finer and more precise control when styling. The low setting can be used at the end to get into shape of hair style.
- Start at the back of the head when drying hair and work forward.
- Do not concentrate the airflow on any one area for long time.
- USE CAUTION: Start with low setting firstly to test the right temperature for your scalp.

NOTE: During the first few minutes when initial use, you may notice smoke and a slight odor, which is normal and will quickly disappear.
