USB Bluetooth Adapter

User Manual

Installation

To avoid software confliction, please uninstall any previously installed third-party Bluetooth drivers or management software on your computer before installing the Bluetooth driver software.

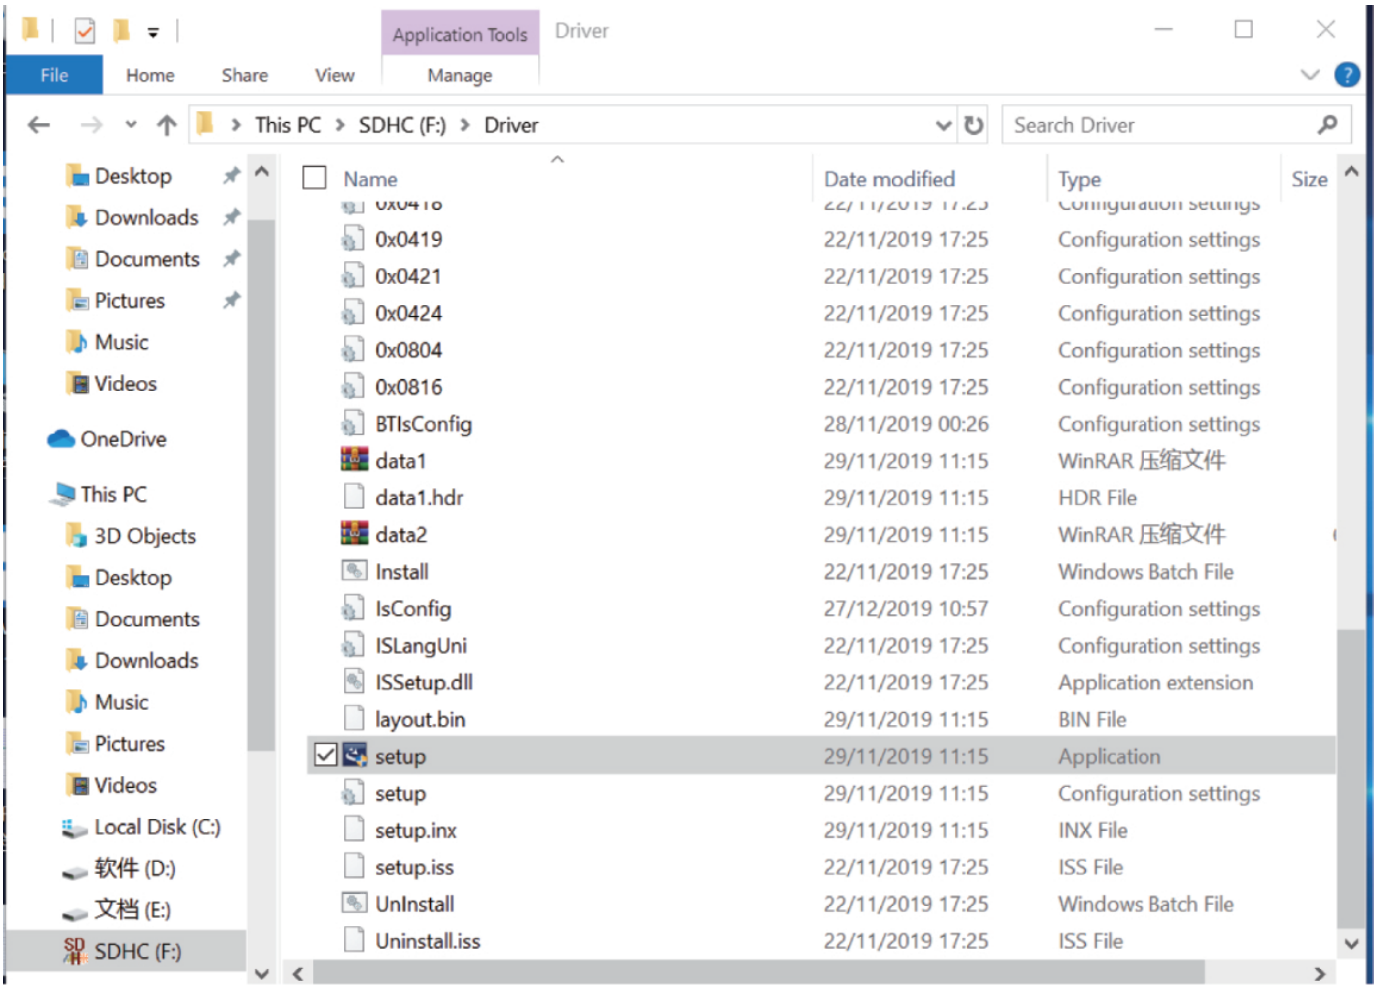

The Default Bluetooth drivers provided by Microsoft Windows have limited functionality, it will installed automatically after you inserting the USB adapter, you still need to install the full driver software on CD if you want to access full functionality (more Bluetooth profiles supported).

System Requirement

- Supported Operating System: Windows 7/8/10/11
- CPU Speed: 500MHz or higher
- Hard Drive Space: 500 MB
- RAM: 1GB or more

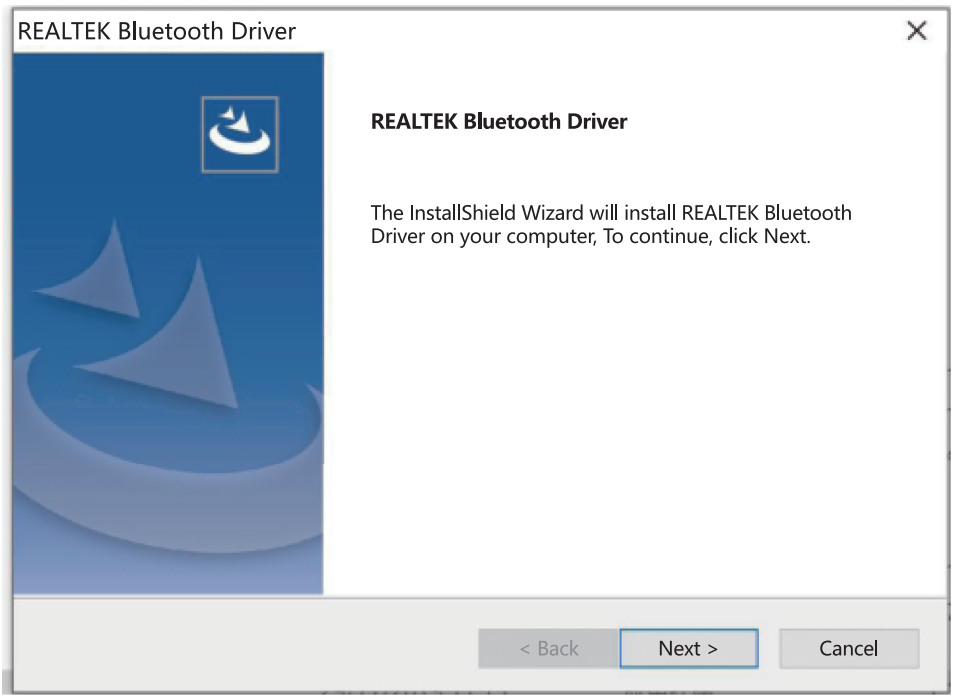

- Installing Drivers from the CD

Connect Bluetooth adapter to computer, Open the CD in Windows Explorer and run Setup.exe under Windows folder

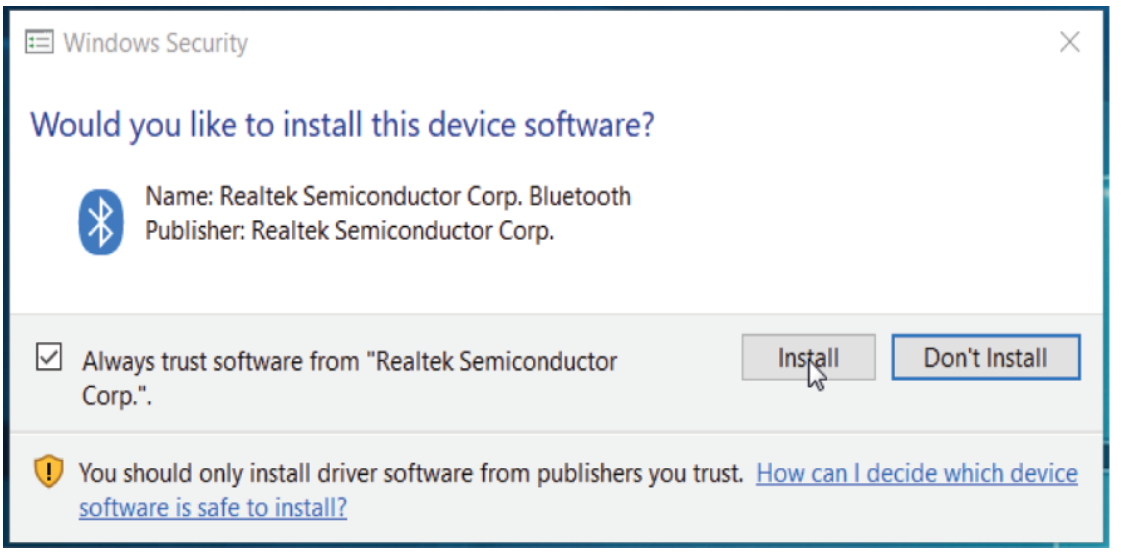

- Auto Installation Program

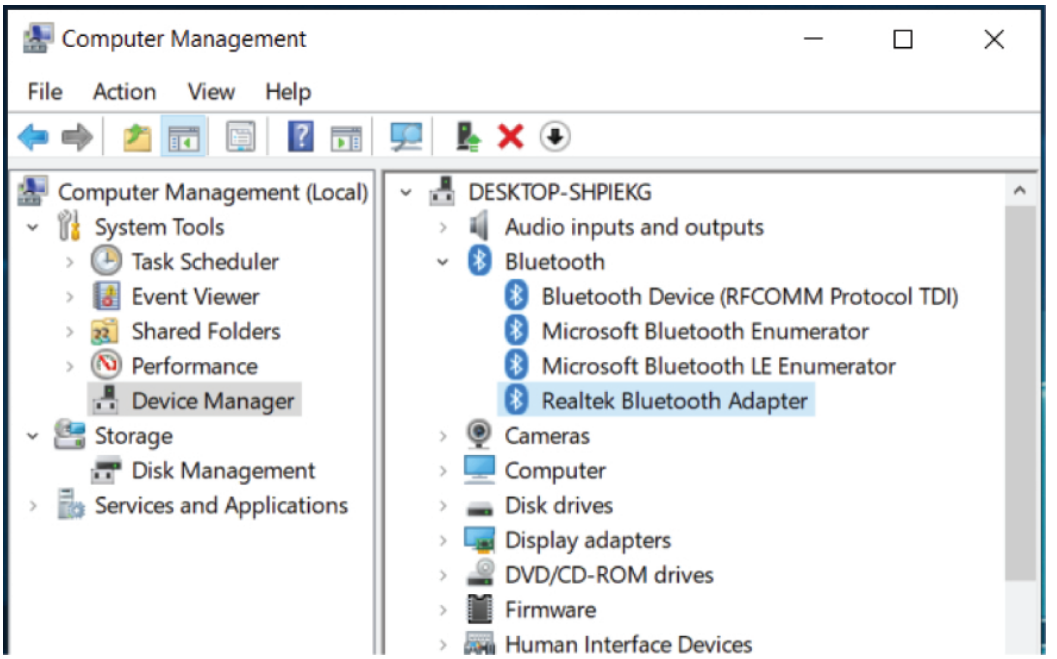

Click Next to start installation

Click Install if there is a Warning window, check Always Trust software from “Realtek Semiconductor Corp”, you need to restart the computer after installation finished.

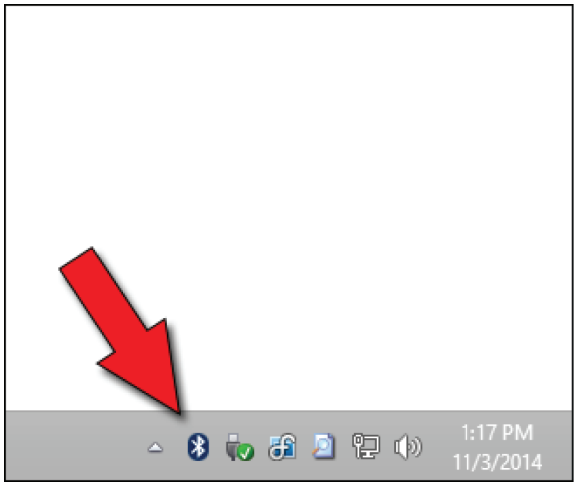

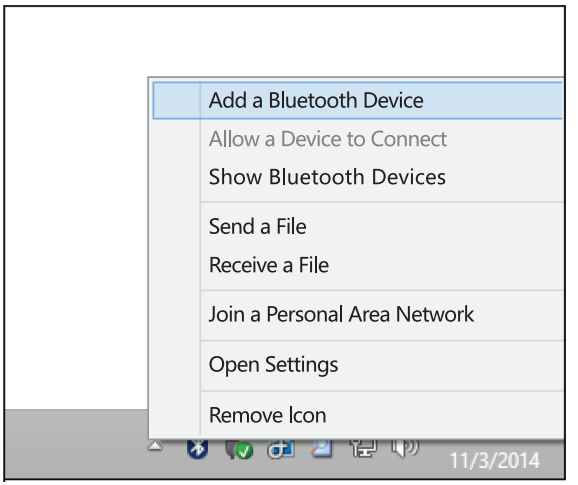

You will find “Realtek Bluetooth Adapter” under Device Manager after driver software installed successfully.

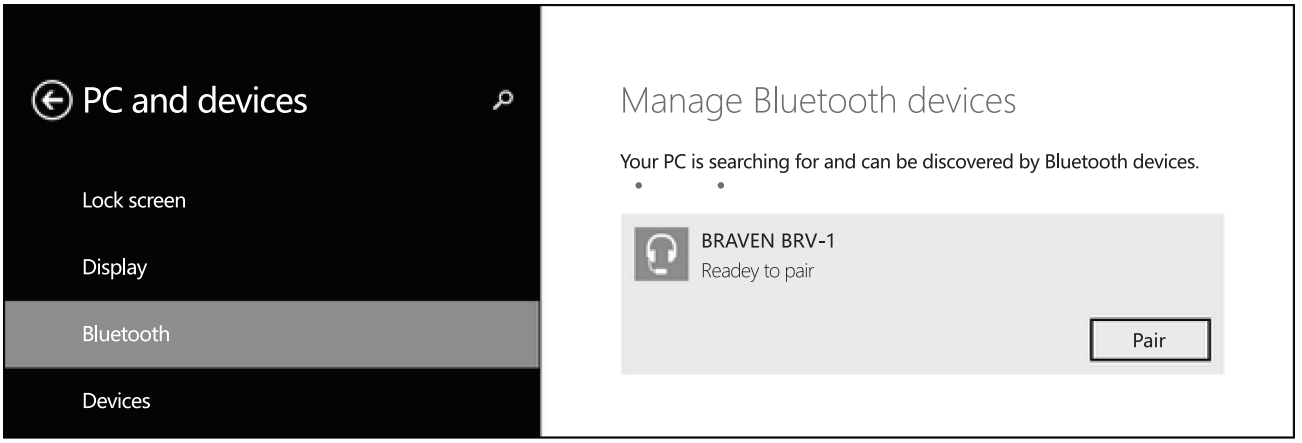

Pair Your Devices

The Bluetooth icon should appear in the system tray after driver installed. Right-click the icon and choose “Add a Bluetooth Device” from the context menu.

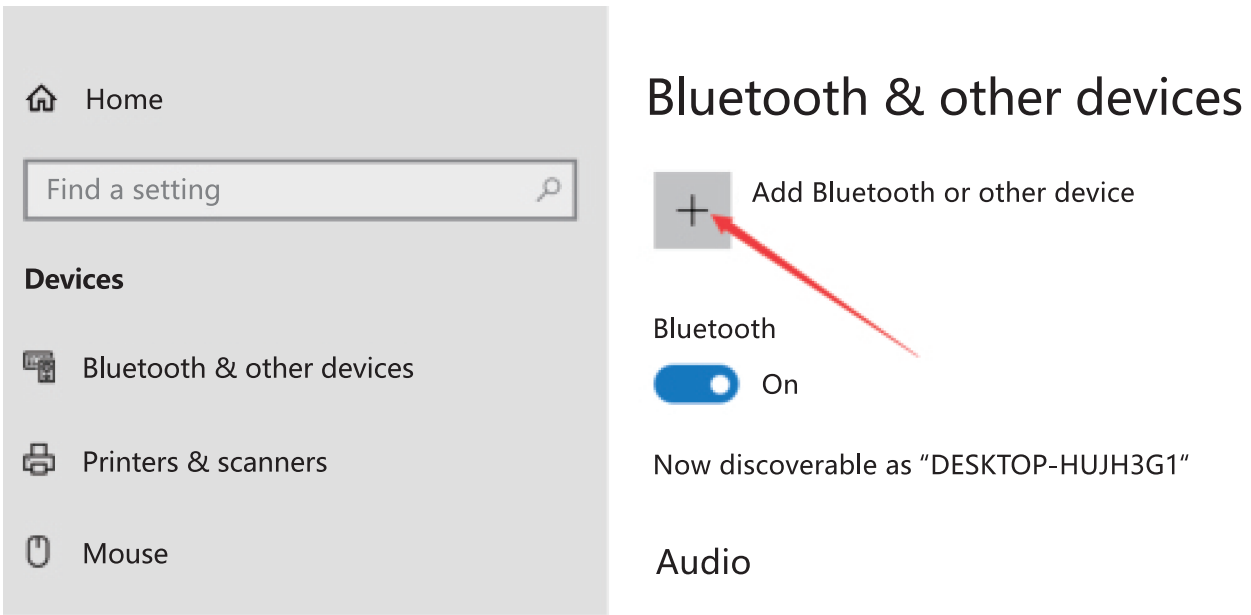

If you're using Windows 8 or 10, you'll see a screen like below. Just click the Pair button for the device you want to connect.

If you're using Windows 7, you'll see a similar screen, select the device you want to connect and then click Next.

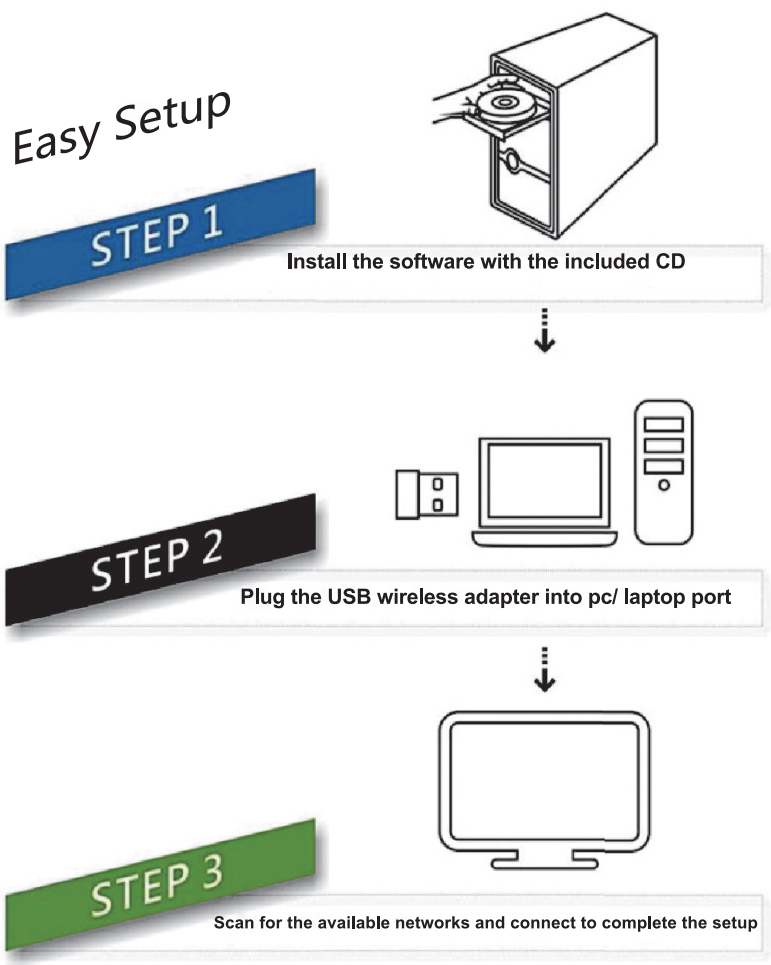

• Pairing a Device that Doesn't Show Up Automatically

If for some reason your device doesn't appear below, click the "Add Bluetooth or Other Device" button located at the top of the Settings window.

Bluetooth USB Adapter

Benutzer-Handbuch

Installation:

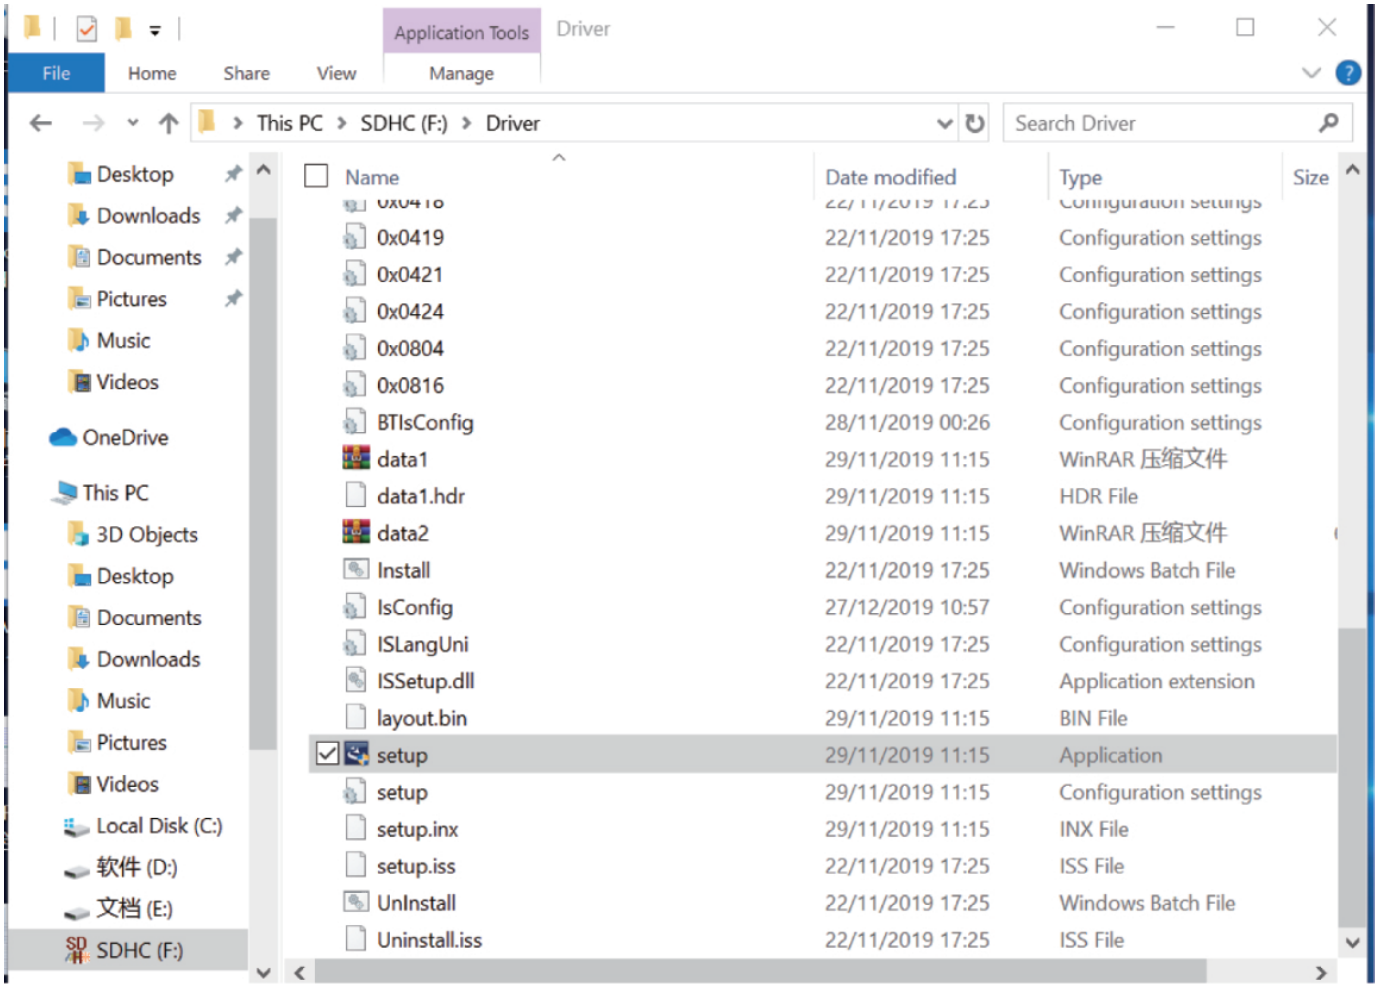

Um Softwarekonflikte zu vermeiden, bitte deinstallieren Sie vor der Installation von der Treibersoftware bluetooth alle bereits installierten Bluetooth-Treiber oder Verwaltungsso ftware eines Fremdherstellers auf Ihrem Computer.
Da die von Microsoft Windows bereitgestellten standard Bluetooth-Treiber eine begrenzte Funktionalität haben, wird die Software automatisch installiert, wenn Sie den USB-Adapter einstecken. Sie müssen die Treibersoftware aus der CD vollständig installieren, wenn Sie auf die volle Funktion zugreifen möchten (mit weiteren Bluetooth-Profilen unterstützt).

Voraussetzungen:

- Unterstütztes Betriebssystem: Windows 7/8/10/11
- CPU-Geschwindigkeit:≧500 MHz
- Festplattenlaufwerk: 500 MB
- RAM: ≧1 GB

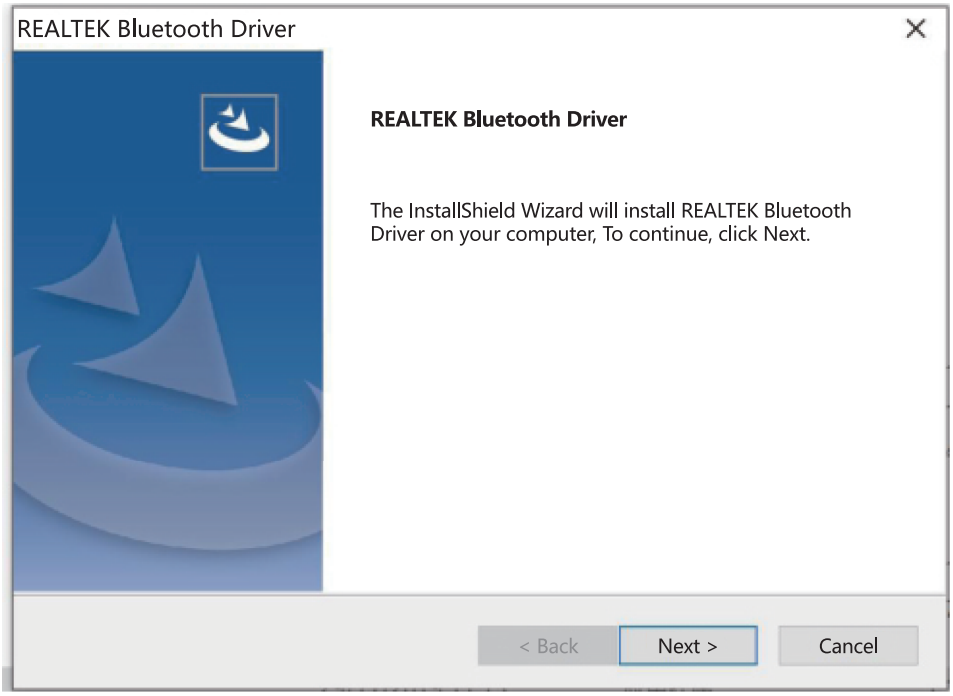

- Treiber von CD installieren

Verbinden Sie den Bluetooth-Adapter mit dem Computer, starten Sie das Installationsprogramm "Setup.exe" von der CD in der Windows Explorer-Ansicht. Lassen Sie "Setup.exe" unter Windows laufen.

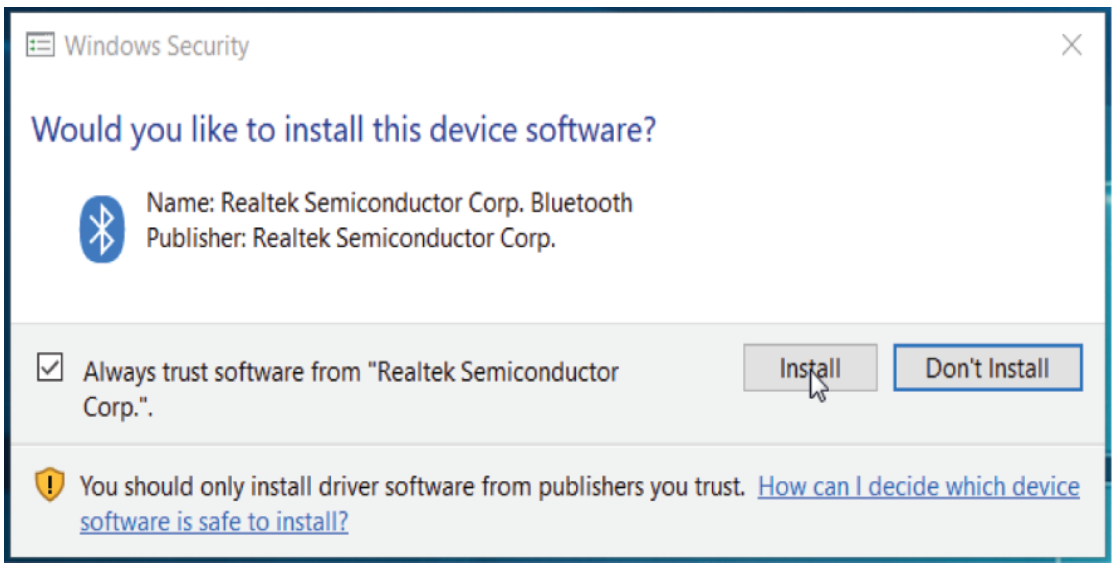

- Auto-Installationsprogramm

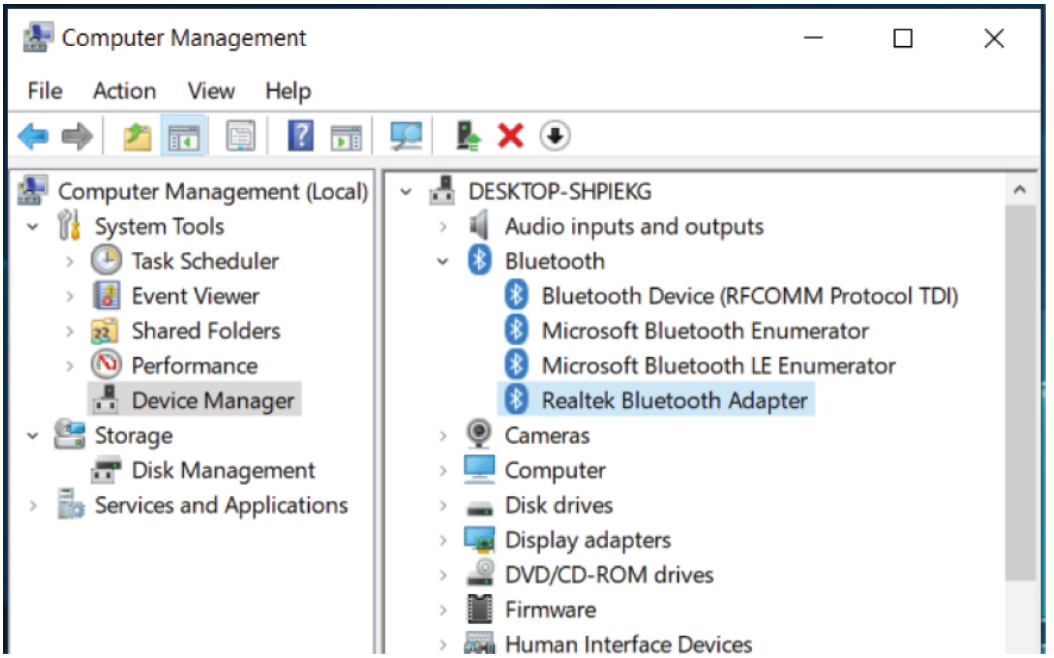

Klicken Sie auf "Weiter" um die Installation zu starten.

Klicken Sie "Installieren" an, falls ein Alarmfenster angezeigt wird. Klicken Sie auf "Immer Vertrauen" an Softwares von "Realtek Semiconductor Corp". Der Computer muss nach dem Beenden der Installation neugestartet werden.

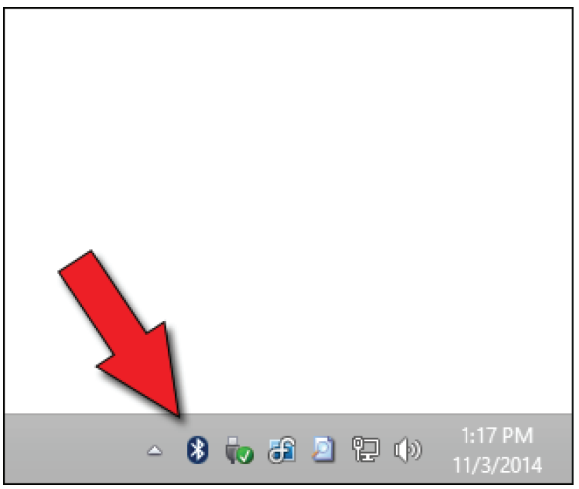

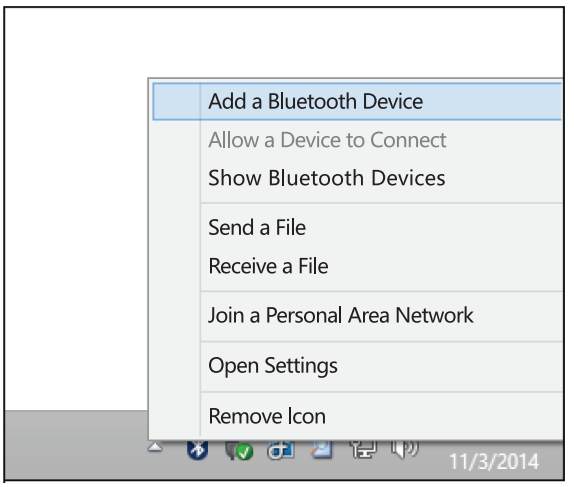

Sie finden Realtek Bluetooth Adapter unter Geräte-Manager, nachdem die Treibersoftware erfolgreich installiert ist.

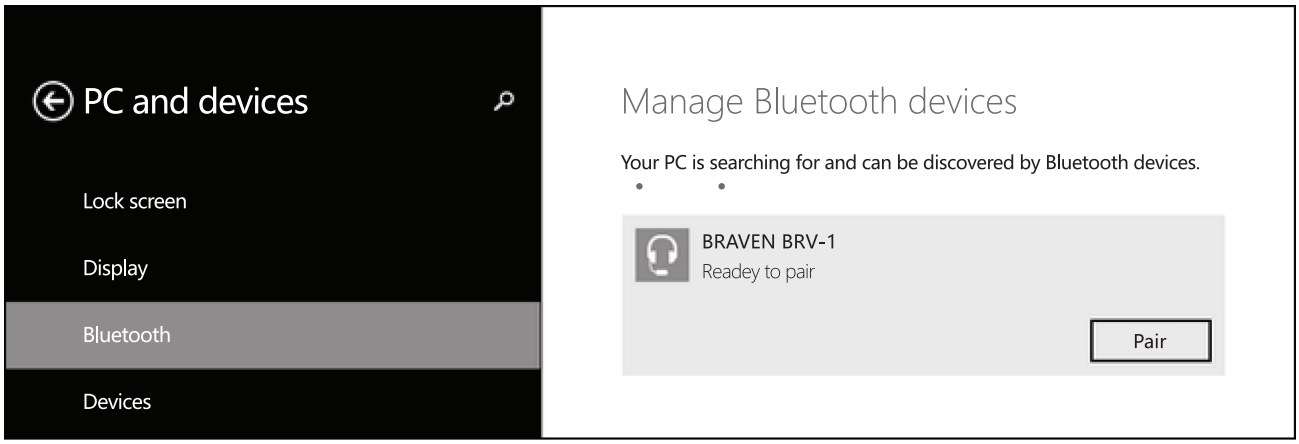

Paarung Ihrer Geräte

Das Bluetooth-Symbol soll nach der Installation des Treibers im Systemfach angezeigt werden. Klicken Sie auf das Symbol mit der rechten Maustaste und wählen Sie "Bluetooth-Gerät hinzufügen" aus dem Menü.

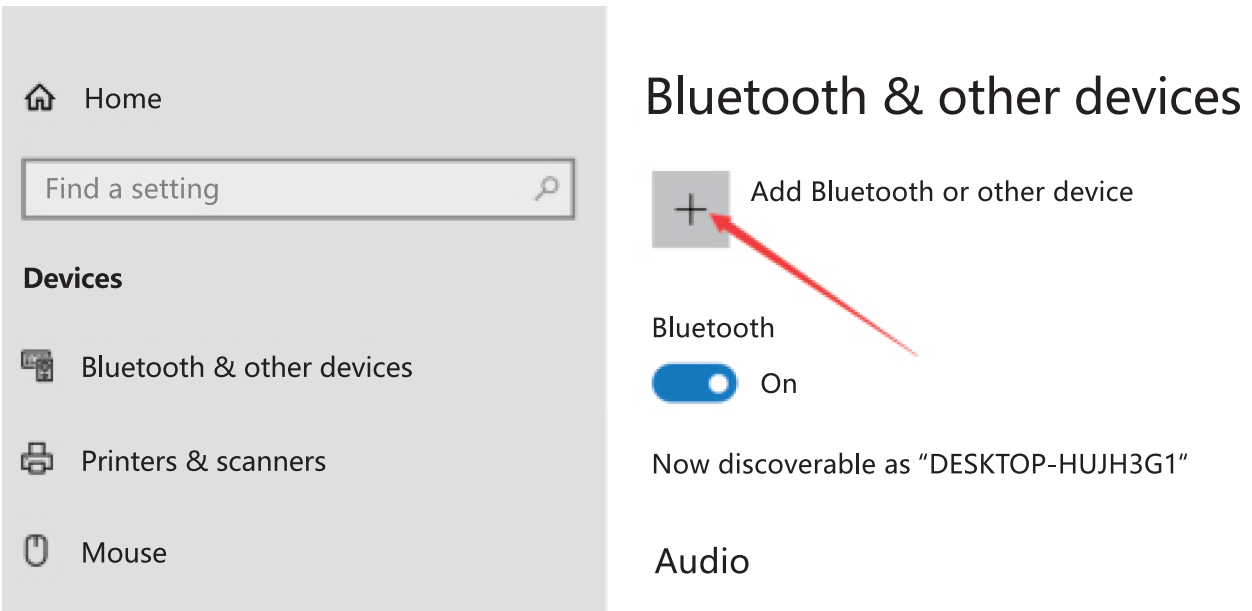

Falls Sie Windows 8 oder 10 benutzen, werden Sie den unteren Bildschirm sehen, klicken Sie einfach auf "Paaren mit dem Gerät".

Falls Sie Windows 7 benutzen, werden Sie einen ähnlichen Bildschirm sehen. Wählen Sie das gewünschte Gerät aus, mit dem Sie die Verbindung herstellen möchten und klicken Sie auf "Weiter"

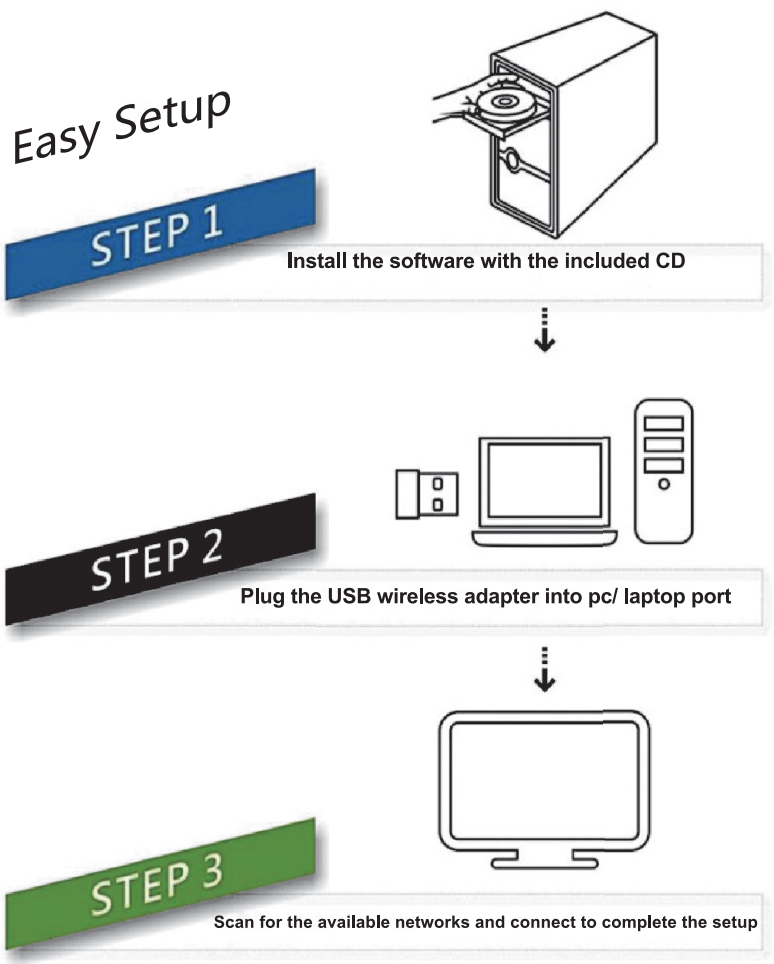

- Paarung mit einem Gerät, das nicht automatisch angezeigt wird

Falls Ihr Gerät aus irgend einem Grund nicht angezeigt wird, klicken Sie auf "Bluetooth oder Weitere Geräte hinzufügen" oben in der Einstellungen.

Adattatore USB Bluetooth

Manuale Utente

Installazione

Per evitare conflitti software, disinstallare eventuali driver Bluetooth di terze parti o software di gestione precedentemente installati sul computer prima di installare il software del driver.

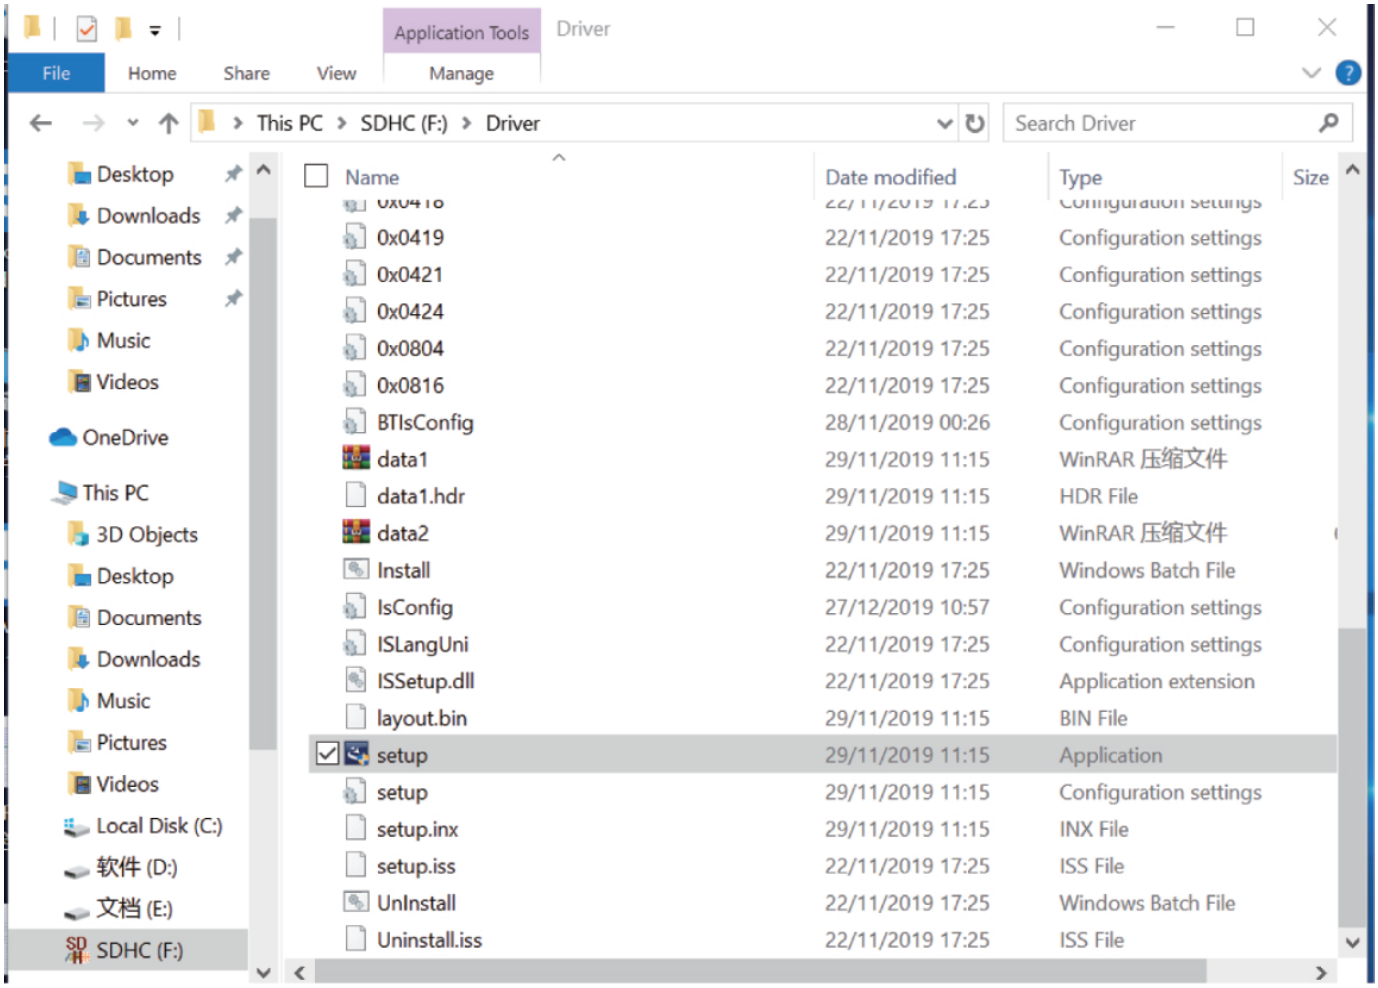

I driver Bluetooth predefiniti forniti da Microsoft Windows hanno funzionalità limitate, verranno installati automaticamente dopo aver inserito l'adattatore USB. È comunque necessario installare il software del driver completo sul CD se si desidera accedere alla funzionalità completa (più profili Bluetooth supportati).

Requisiti del sistema

- Sistemi operativi supportati: Windows 7/8/10/11
- Velocità della CPU: 500MHz o superiore
- Spazio sul disco rigido: 500 MB
- RAM: 1GB o più

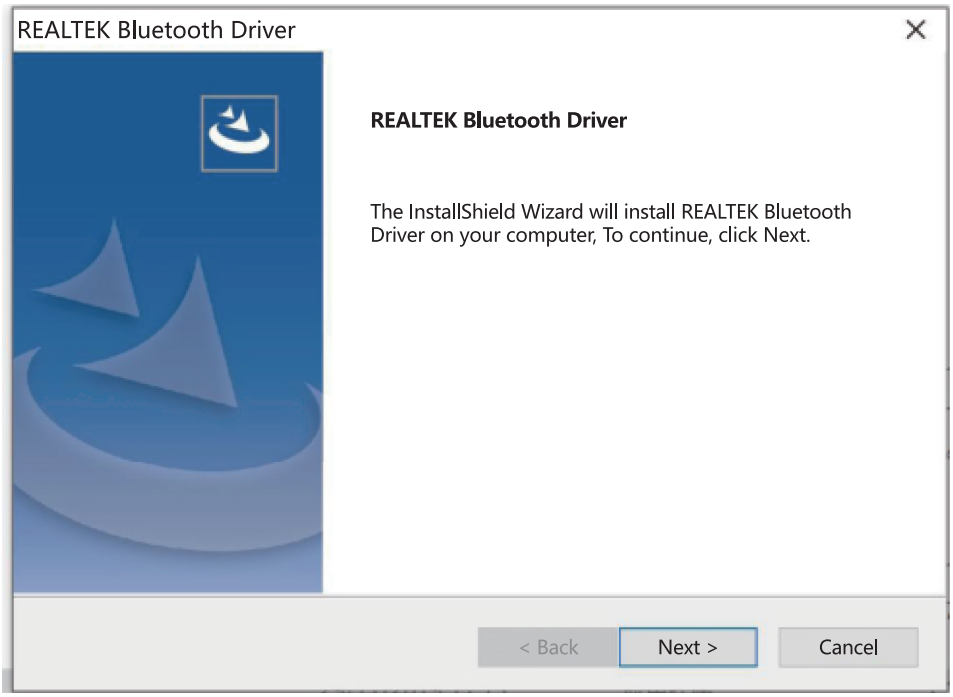

• Installare i driver dal CD

Collegare l'adattatore Bluetooth al computer. Aprire il CD in Esplora risorse ed eseguire Setup.exe nella cartella Windows.

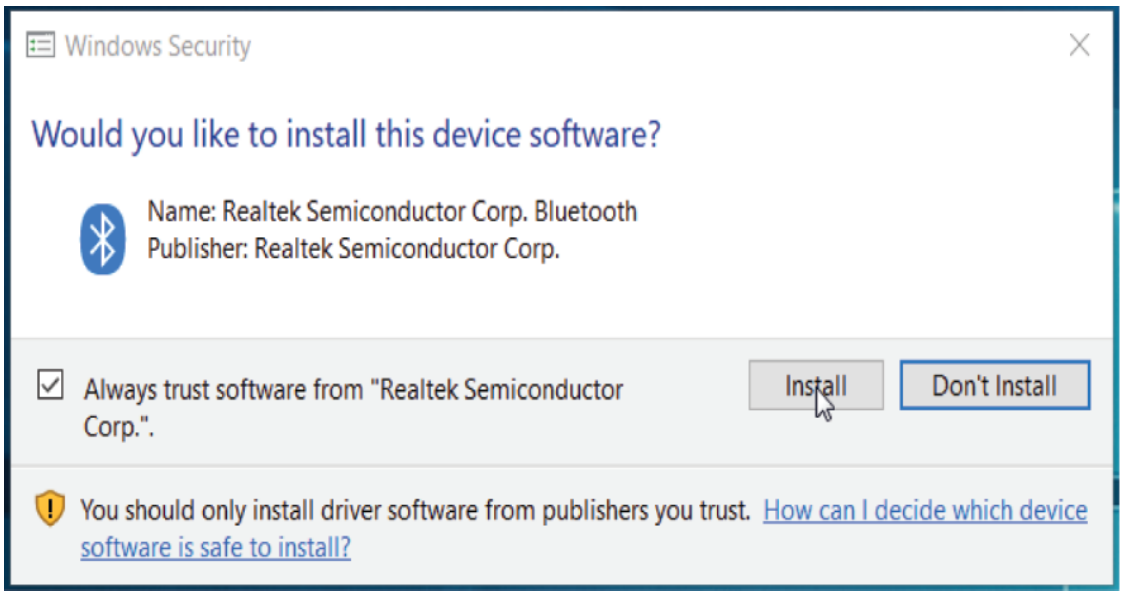

• Programma di installazione automatica

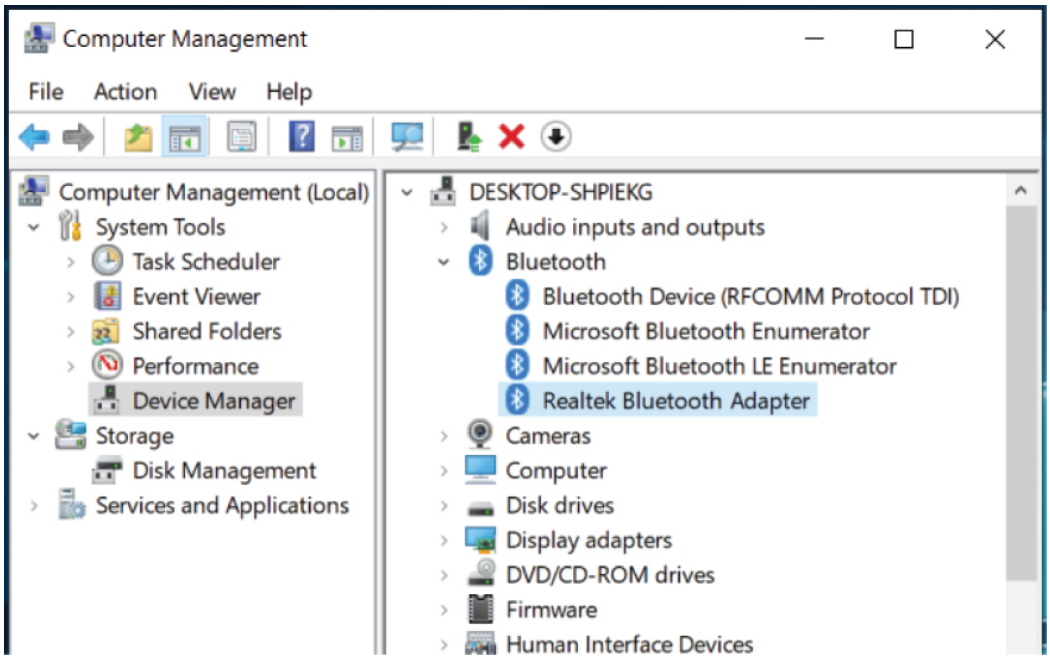

Fare clic su Next(Avanti) per avviare il processo di installazione

Fare clic su Install(Installa) se è presente una finestra di avviso. Selezionare Always Trust software from "Realtek Semiconductor Corp"(Fidati sempre del software di "Realtek Semiconductor Corp"). È necessario riavviare il computer al termine dell'installazione.

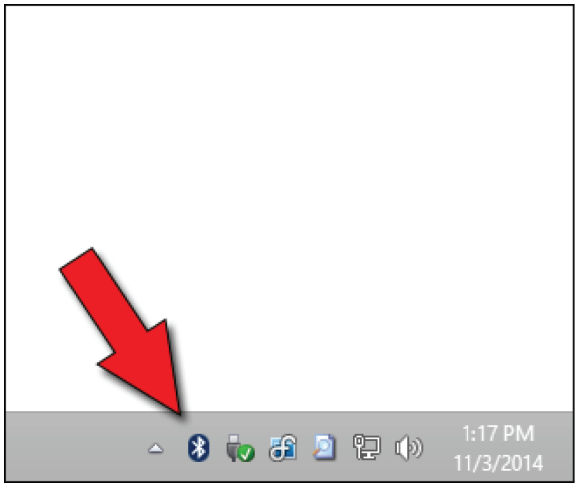

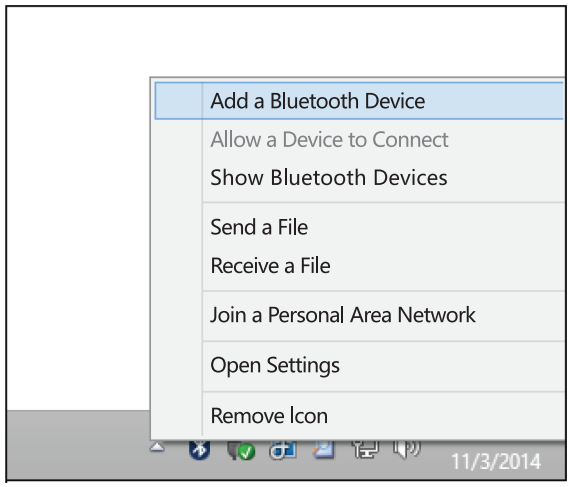

Si troverà "Realtek Bluetooth Adapter" in Device Manager (Gestione dispositivi) dopo che il software del driver è installato con successo.

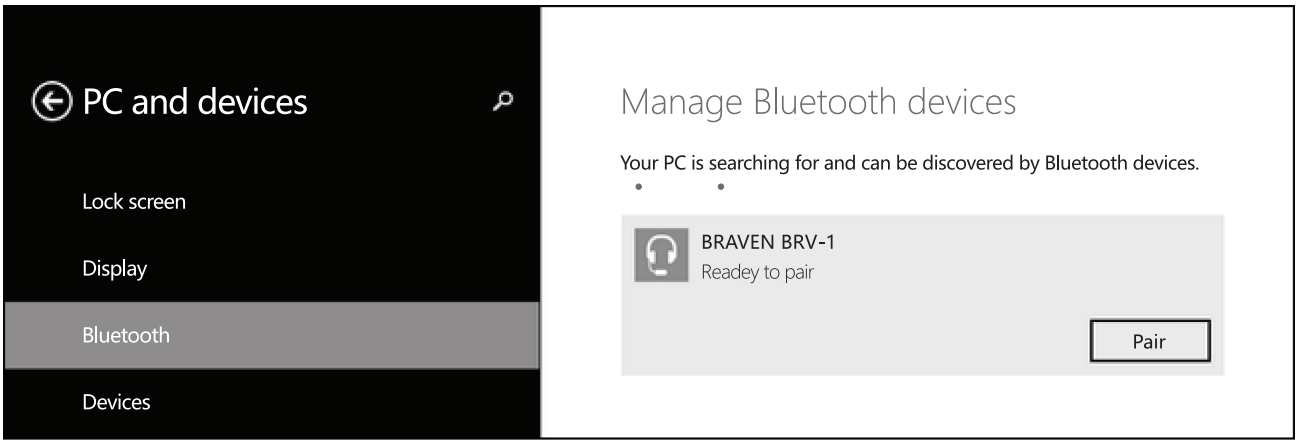

Associare i tuoi dispositivi

L'icona Bluetooth dovrebbe apparire nella barra delle applicazioni dopo l'installazione del driver. Fare clic destro sull'icona e selezionare "Add a Bluetooth Device"("Aggiungi un dispositivo Bluetooth") dal menu contestuale.

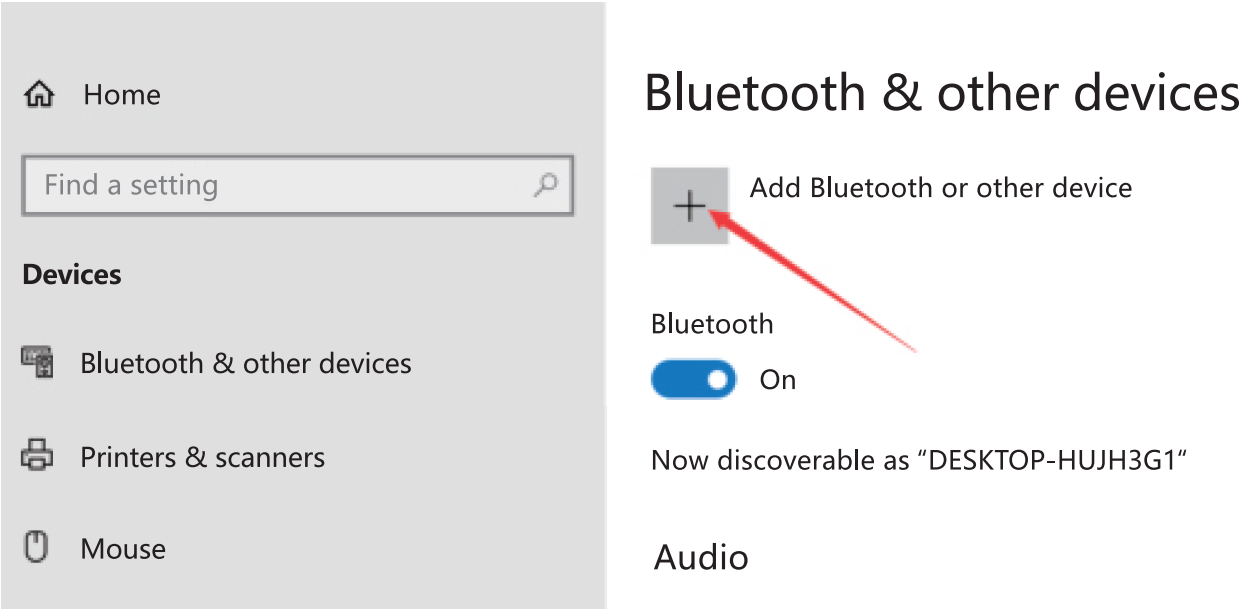

Se si utilizza Windows 8 o 10, si troverà una schermata come sotto. Basta fare clic sul pulsante Pair(Associa) per il dispositivo che si desidera connettere.

Se si utilizza Windows 7, si troverà una schermata simile. Selezionare il dispositivo che si desidera connettere, poi fare clic su Next(Avanti).

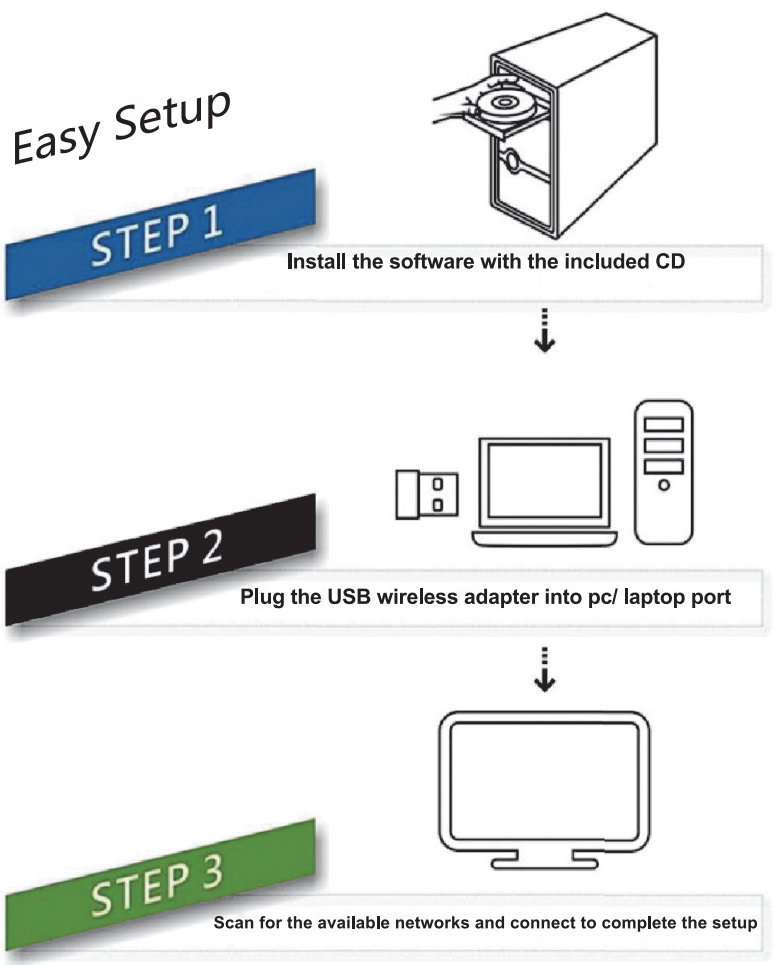

• Associazione di un dispositivo che non viene visualizzato automaticamente

Se per qualche motivo il tuo dispositivo non viene visualizzato di seguito, fare clic sul pulsante "Add Bluetooth or Other Device"("Aggiungi Bluetooth o altro dispositivo") situato nella parte superiore della finestra Impostazioni.

Adaptateur USB Bluetooth

Manuel de l'Utilisateur

Installation

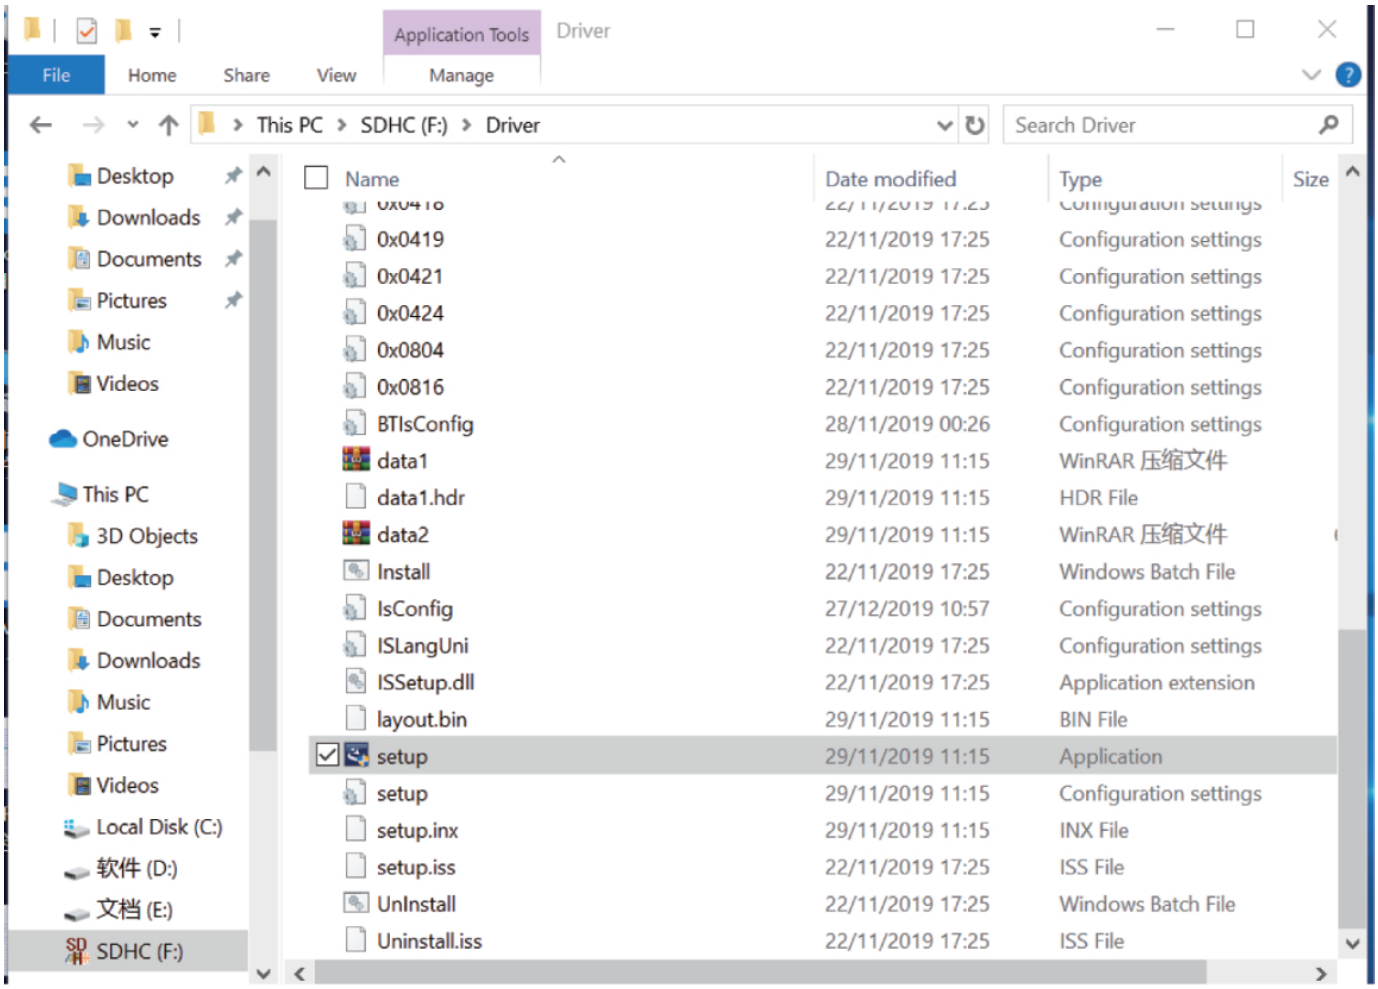

Pour éviter les conflits de logiciels, veuillez désinstaller tout drive Bluetooth tiers ou logiciel de gestion précédemment installé sur votre ordinateur avant d'installer le drive du logiciel
Le drive Bluetooth par défaut fourni par Microsoft Windows ont des fonctions limitées, il sera automatiquement installé après avoir inséré l'adaptateur USB, vous devez installer encore le logiciel de drive complet sur CD pour accéder à toutes les fonctionnalités (plus de profils Bluetooth soutenus).

- Soutenir le système d'exploitation: Windows 7/8/10/11
- Vitesse du processeur: 500 MHz ou plus
- Espace disque dur: 500 MB
- RAM: 1 GB ou plus

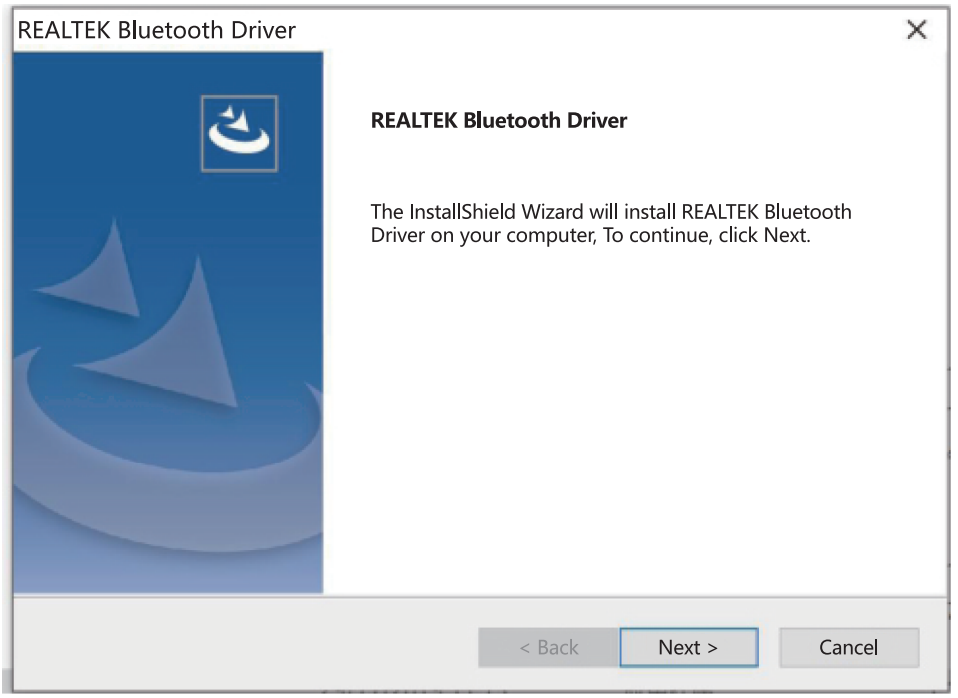

• Installation des drives du CD

Connecter l'adaptateur Bluetooth à l'ordinateur, ouvrir le CD dans l'Explorateur Windows et exécuter Setup.exe sous le dossier Window

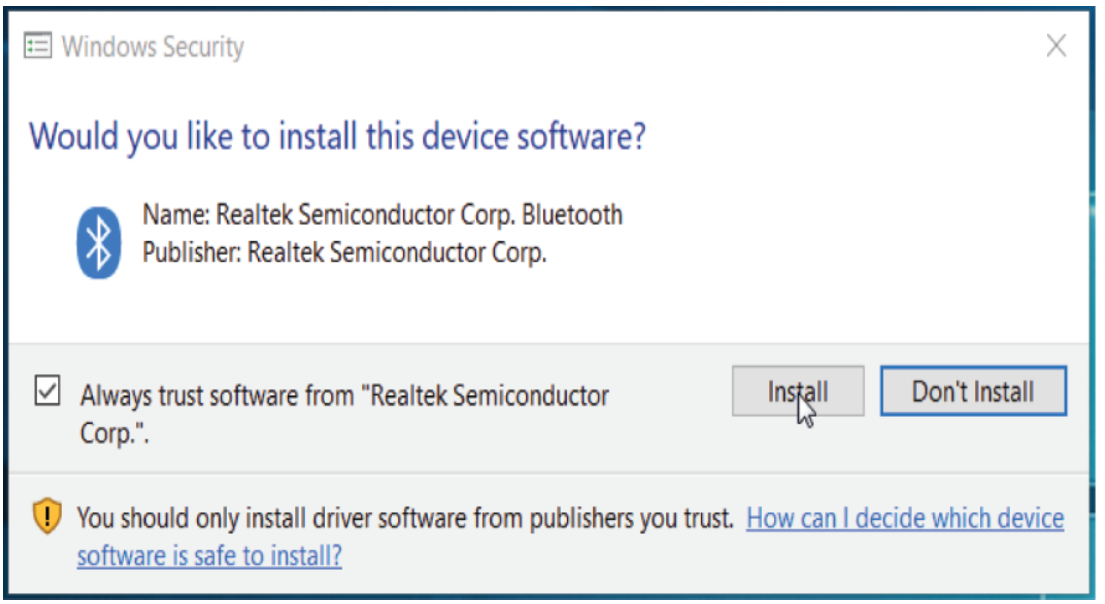

- Programme d'installation automatique

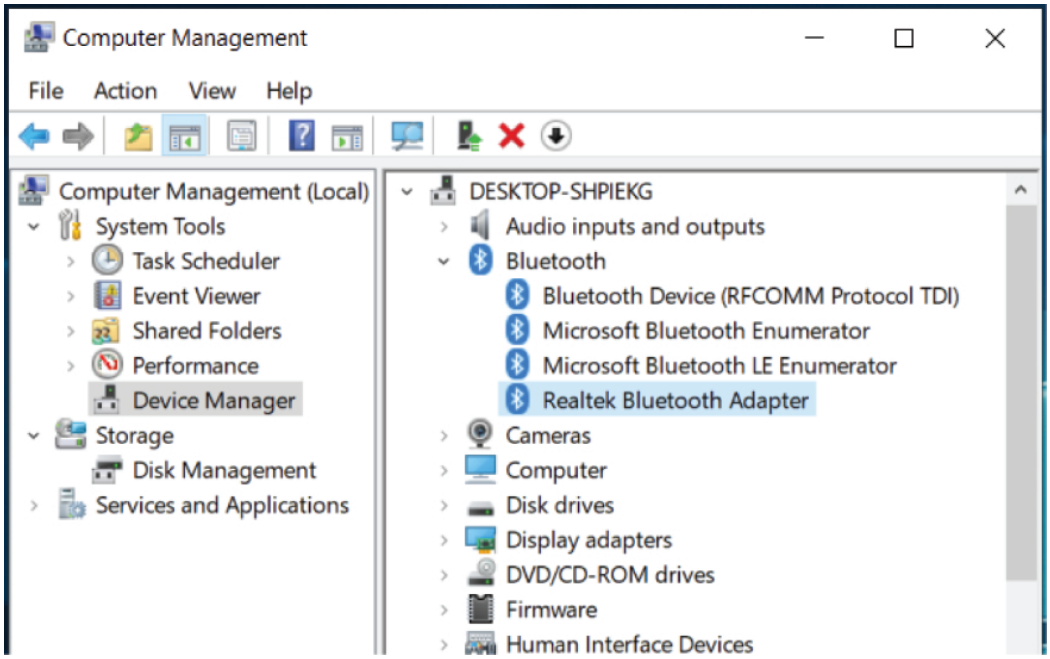

Cliquer sur Suivant pour démarrer l'installation

Cliquer sur Installer s'il y a une fenêtre d'avertissement, cocher Logiciel Toujours confiance de *Realtek Semi-conducteur Corps », vous devez redémarrer l'ordinateur une fois l'installation terminée.

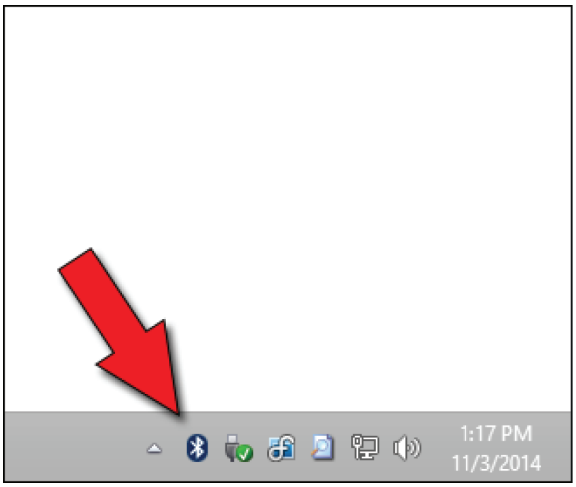

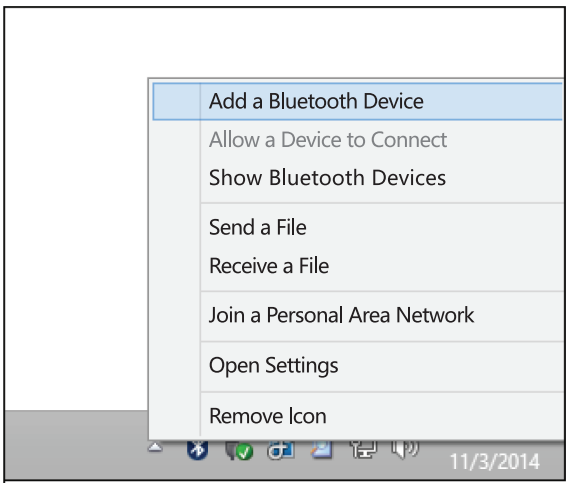

Vous trouverez «Realtek Bluetooth Adapterv sous Gestionnaire d’appareil après l'installation réussie du pilote logiciel.

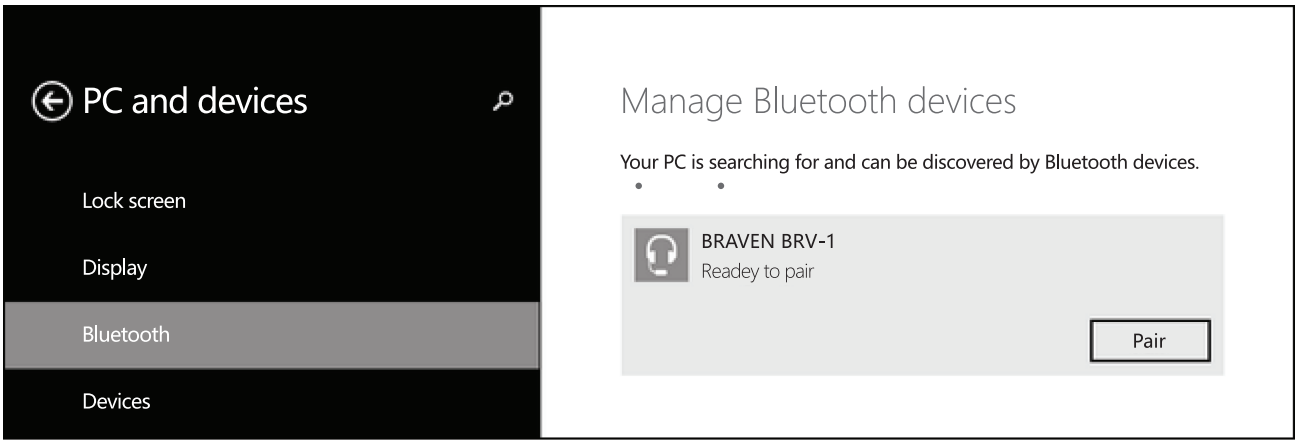

Associer vos appareils

L'icône Bluetooth devrait apparaître dans la barre d'état système après l'installation du drive. Faire un clic droit sur l'icône et choisir « Ajouter un appareil Bluetooth » dans le menu contextuel.

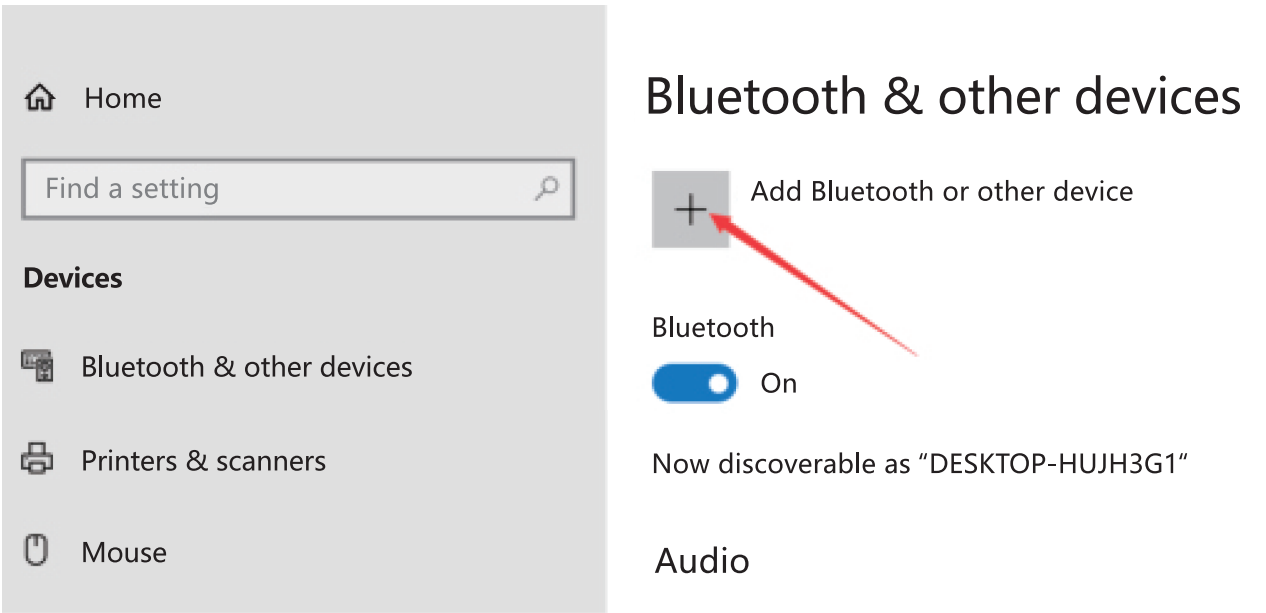

Si vous utilisez Windows 8 ou 10, vous verrez un écran comme ci-dessous. Cliquez simplement sur le bouton Pair pour l'appareil que vous souhaitez connecter

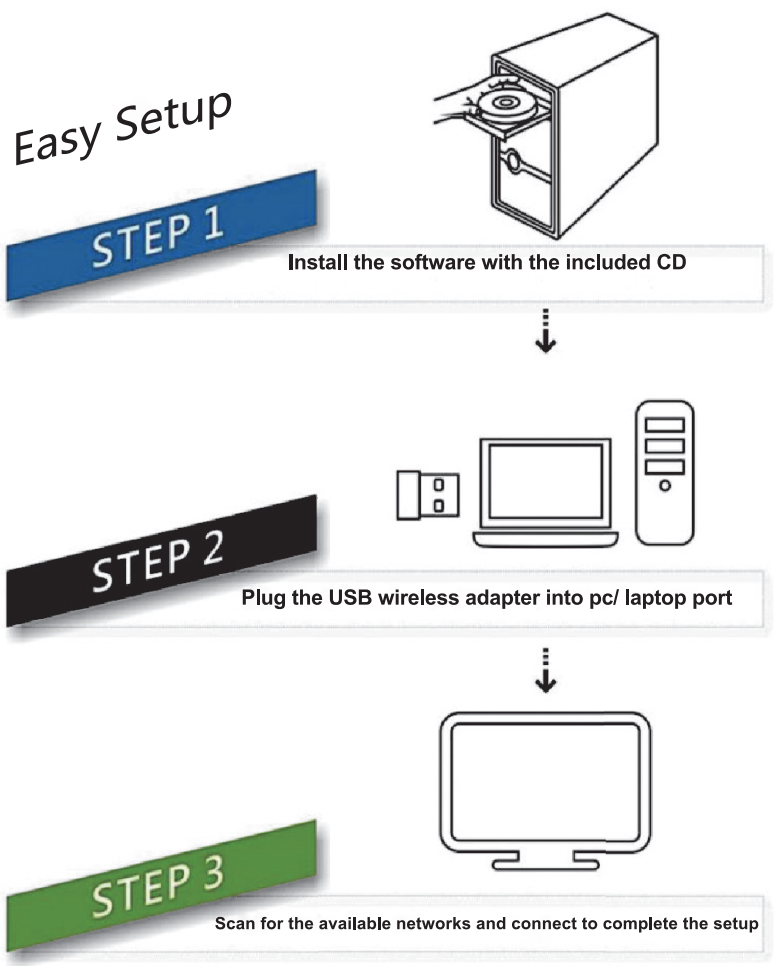

Si vous utilisez Windows 7, vous verrez un écran similaire, sélectionnez l'appareil que vous souhaitez connecter, puis cliquez sur Suivant.

• Association d'un appareil qui ne s'affiche pas automatiquement Si, pour une raison quelconque, votre appareil n'apparaît pas ci-dessous, cliquez sur le bouton MAdd Bluetooth ou autre appareil « situé en haut de la fenêtre Paramètres.

Adaptador Bluetooth USB

Manual de Usuario

Instalación

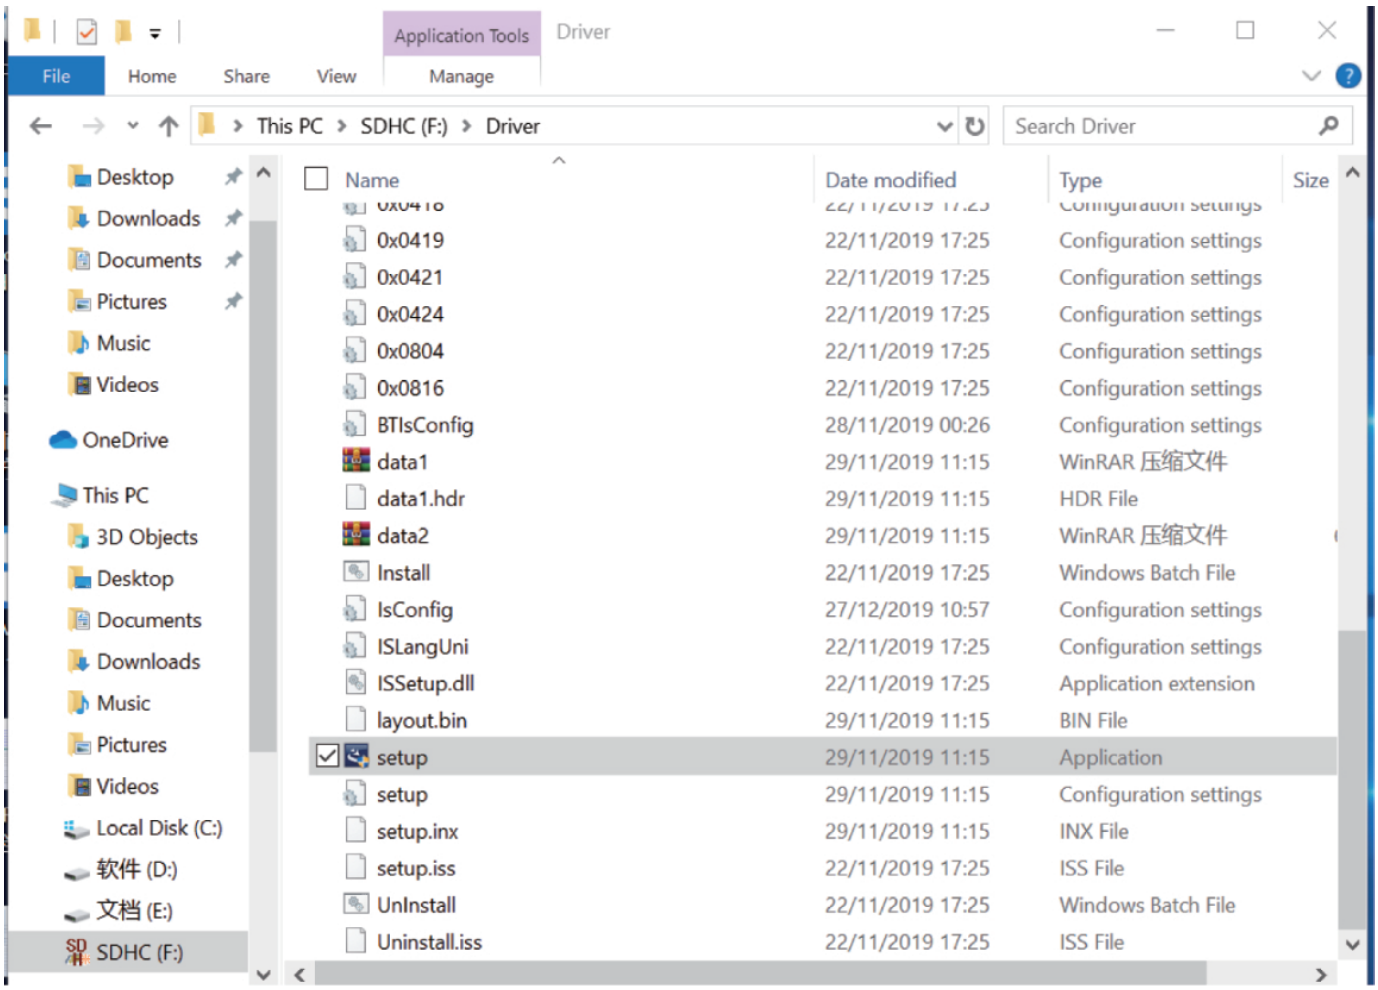

Para evitar conflictos de software, favor desinstale cualquier controlador de Bluetooth de terceros instalado previamente o software de gerenciamiento en su computadora antes de instalar el software controlador.
Los controladores Bluetooth por de fábrica provistos por Microsoft Windows tienen funcionabilidad limitada, se instalará automáticamente después de insertar el adaptador USB, aún necesita instalar el software del controlador completo en el CD si desea acceder a la funcionalidad completa (mas perfiles de Bluetooth son soportados).

Requerimientos de Sistema

- Sistema operativo soportado: Windows 7/8/10/11
- Velocidad del CPU: 500 MHz o mayor.
- Espacio del Disco Duro: 500 MB
- Memoria RAM: 1 GB o más.

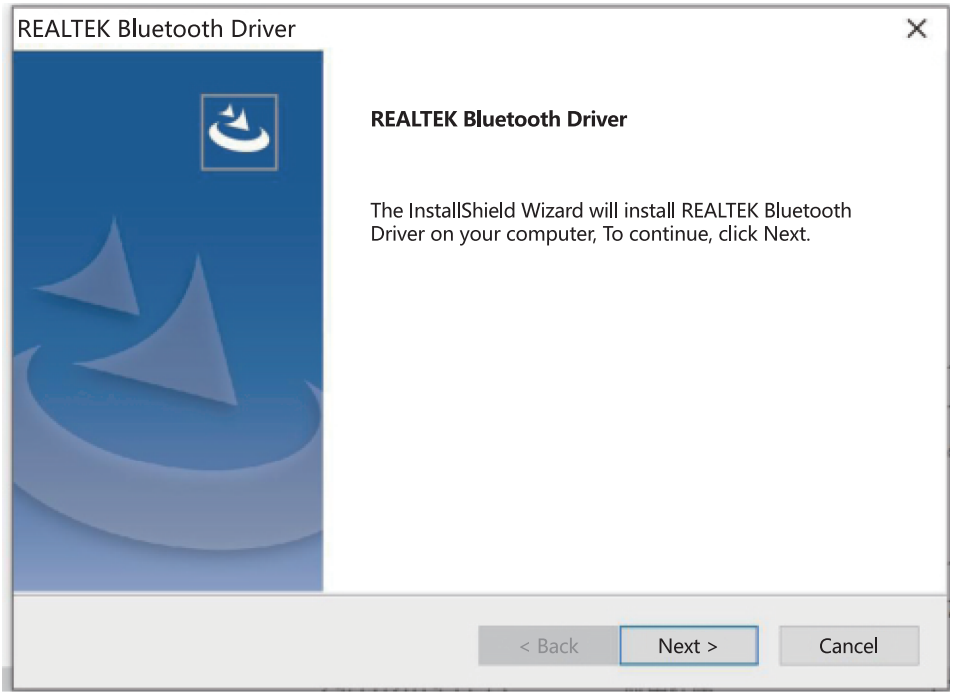

• Instalación de Controladores desde el CD

Conecte el adaptador Bluetooth a la computadora, abra el CD en el Explorador de Windows y corra Setup.exe bajo la carpeta de Windows

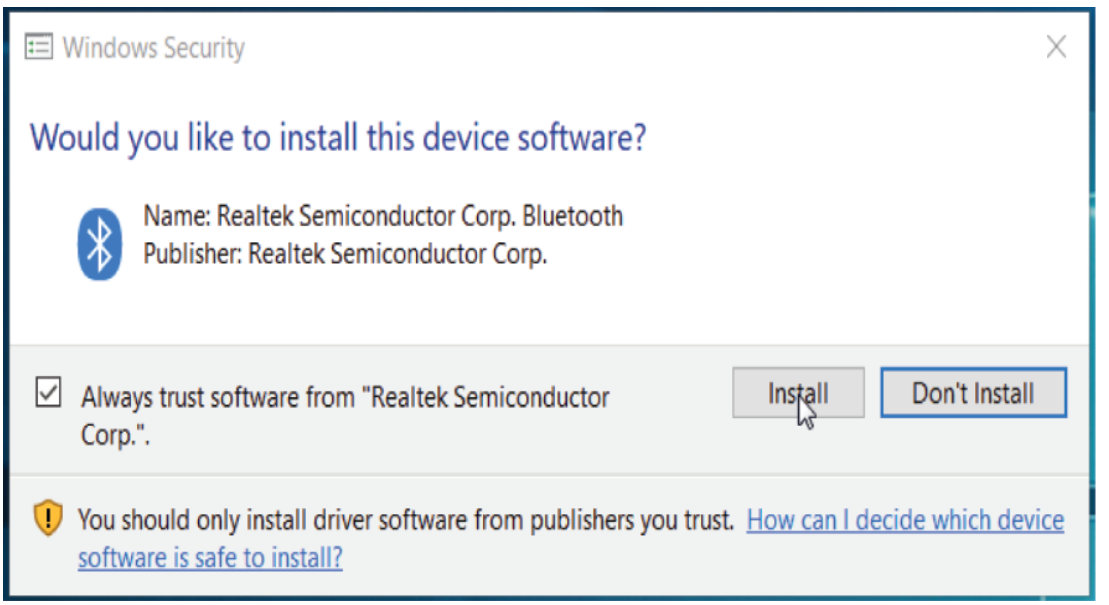

• Programa de Instalación Automática

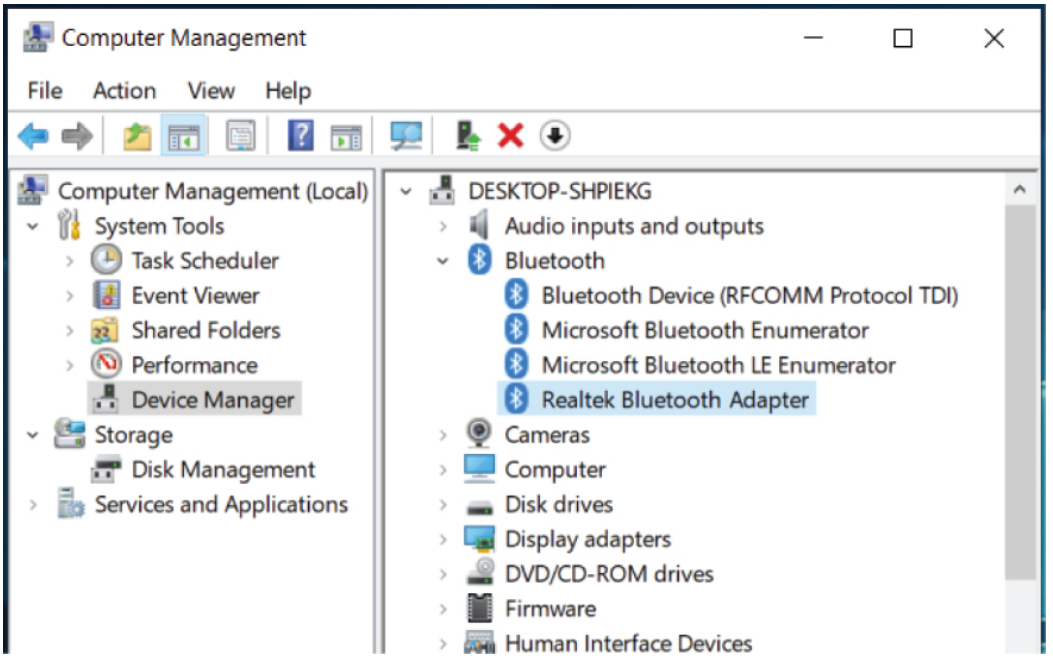

Haga clic en siguiente para comenzar la instalación

Haga clic en instalar si hay una ventada de Advertencia, seleccione confíe siempre en el Software de "Realtek Semiconductor Corp", necesitará reiniciar la computadora luego de que ha terminado la instalación.

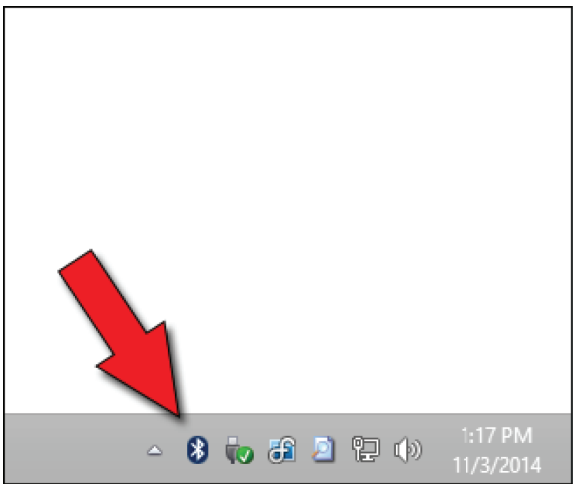

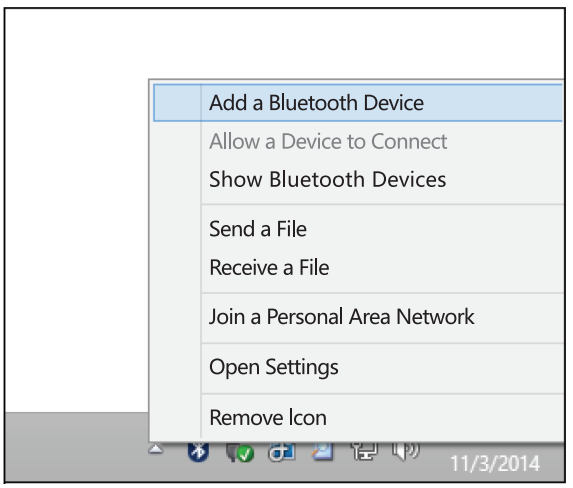

Encontrará “Realtek Bluetooth Adapter debajo del Administrador de Dispositivos luego de la que se haya realizado la instalación satisfactoriamente.

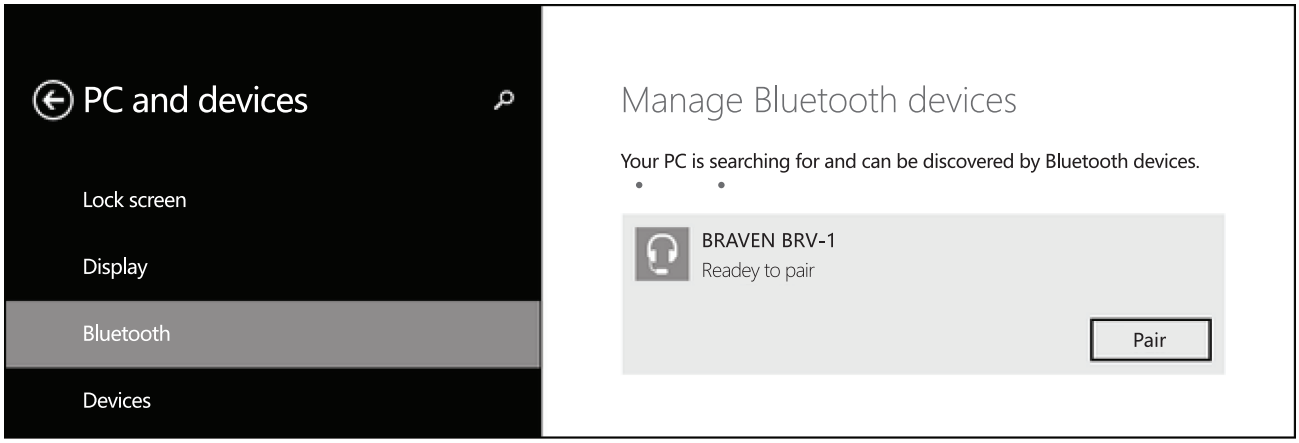

Empareje sus Dispositivos

El ícono Bluetooth deberá aparecer en la bandeja del Sistema luego de que el controlador se ha instalado. Dele clic con el botón derecho en el icono y seleccione “Agregue Dispositivo Bluetooh” del menú contexto

Si está usando Windows 8 o 10, verá una pantalla como acá abajo. Solo dele clic al botón de Emparejar para el dispositivo que quiera conectar.

Si está usando Windows 7, verá una pantalla similar, seleccione el dispositivo que quiera conectar y entonces dele clic en continuar.

• Emparejar un Dispositivo que no se muestr automáticamente

Si por alguna razón su dispositivo no se muestra, dele clic al botón “agregar Bluetooth u Otro Dispositivo” localizado en la parte superior de la ventana de Configuración
