DermaWand® **CREAMS AND LOTIONS AREN'T ENOUGH** OTHER ALTERNATIVES ARE TOO EXPENSIVE AND INVASIVE ✓ DermaWand® is **CLINICALLY PROVEN** to help reduce the visible signs of aging ✓ Reduce the appearance of fine lines and wrinkles ✓ Tone and tighten sagging skin ✓ Improves skin's appearance ✓ Reduce pore size Look as young as you feel with DermaWand®! How do we do it? DermaWand® employs radio frequency technology similar to the large clinical machines used by medical and skin care specialists, but with a lower frequency and amplitude, that's perfect for daily home use. The DermaWand®'s instant stimulation rejuvenates the skin by sending out a gentle stream of low level micro-current impulses up to 100,000 cycles per second, creating a massage effect. Massage helps improve circulation bringing oxygen and vital nutrients to your skin's surface. The gentle micro-current also has a thermal effect on the skin's surface, helping the skin look more youthful, toned and tightened, smoothing out the appearance of fine lines and wrinkles while reducing pore size. Plus, DermaWand® bathes the skin in enriched oxygen that cleanses and purifies, helping breathe new life into your skin's surface. Lisa Varga Award Winning Film and TV Actress Age 43, No Cosmetic Surgery Six Year DermaWand® User

DermaWand®

To prove that DermaWand® really works, the inventor used it on just one side of her face for 12 weeks.

The results speak for themselves! Eyebrow appears lifted, deep wrinkles and skin folds appear **smoothed**, lines and wrinkles appear **softened**, cheek puffiness and laugh lines vastly **diminished** and pore size is **reduced**.

With just two DermaWand treatments a day, each taking as little as 3 minutes, you too can achieve these types of results and look years younger! The Photo That Launched a Sensation
