

USAGE

Start with a proper NailPerfect preparation, as you would with any other product. After having properly prepped: apply Dippn' Sticky Base onto the entire nail. Keep in mind to keep a few millimeters from the cuticles and laterals.

The next step is to dip the nail in your favorite color. Let the powder set for approximately 15 seconds. Use a Manicure Brush to remove excessive powder.

Now apply a second layer Dippn' Sticky Base on the entire nail. Than also apply a second layer of NailPerfect Dippn' powder on the entire nail. Let the powder set for about 15 seconds. Use a Manicure Brush to remove excessive powder. Apply another layer of Dippn' Sticky Base and let it dry for again 30 seconds. Apply two layers of Dippn' Activator to cure the Sticky Base.

Finishing options:

- Finish with Dippn' Fast Air Dry Top Coat for a shiny finish.

- Finish with Dippn' Air Dry Top Coat Matt for a matte finish.

Step 9: Massage the cuticles with UPVOTED Cuticle oil Sweet or Psycho to top it off.

Tip: apply Sticky Base one by one on each nail to make sure the Sticky Base absorbs the Dippn' powder.

Removal of Dippn'

Method 1: Remove the top layer with a 180 grit NailPerfect file. Apply a thick layer of the Dippn' Remover on the Dippn' color. Do not apply on skin! Let it soak for approximately 5 minutes. Remove the soaked Dippn' residues with an Orange Wood Stick. Repeat until the product has been completely removed.

Method 2: Remove the top layer with a 180 grit NailPerfect file. Take a nail foil with acetone and fold it onto the finger. Let it soak for 20 minutes. Remover the nail foil and remove the soaked product with an Orange Wood Stick.
