

MAGNETIC CELL PHONE CASE INSTRUCTIONS FOR USE

1. Verify the Cell Phone Case is the correct size for your cell phone by checking the product label.
2. Open the case and press the corners of your cell phone into the magnetic nesting until it fits firmly inside.
3. Before bringing your cell phone up to your head or ear, flip the shielded front cover closed over the screen.
4. Speak on the phone as you normally would. Voice and sound quality will not be affected since the microphone is unobstructed on the bottom of your phone and a small opening over the ear speaker allows you to hear perfectly.
5. The magnetic nesting detaches from the shielded case for easy access.
6. If you put your phone in your pocket, purse or bag, keep the shielded front cover closed and facing towards your body.
7. While using your phone's touchscreen, flip the front cover around to the back to block emissions coming from the back of the phone.
