

the world's largest and most diverse collection of biological specimens. The collection is housed in the University and Jepson Herbaria Archives, which are located in the Jepson Herbaria Building on the University of California, Berkeley campus.

The Archives are a treasure trove of information for researchers in a wide range of fields, from botany and plant biology to ecology and conservation. The collection includes over 100 million specimens, including plants, fungi, and animals, and is one of the most important resources for understanding the history and diversity of life on Earth.

The Archives are also a major center for the study of plant systematics and evolution. The collection includes many rare and endangered species, and is a valuable resource for understanding the relationships between different groups of plants and animals.

The Archives are open to the public, and offer a variety of programs and services. Visitors can view the collection, learn about the history of the Archives, and participate in special events and lectures. The Archives are a must-visit for anyone interested in the history and diversity of life on Earth.
