Maintenance

1. Turn the printer off, remove the power cord,and open thecover.
2. Wait until the printer head cools down.
   The printer head may be very hot after printing.
3. Completely clean printer head using an alcohol swap (not water).
4. Wait until the alcohol has completely vaporized, then close the cover.
5. Connect the power cord and print a test page to check if it is clean.

NOTICE

Ensure poweris off when performing maintenance.

PRO TIPS

Avoid using poor quality labels as they can damage the printer.
Regularly clean the printer head.
If paper is jammed, turn off the printer, and allow the printer head to cool down. Open the cover and ensure that the rubber is clean. If dirty,use alcohol to clean. Allow the area to dry off before turning the printer on.
Insert this printer into the same USB port on your computer every time. This will avoid creating duplicate copies of the printer in your operating system.

Safty notices

The printer head can become very hot after printing labels. Do not touch the printer head.

Do not bend the power cord excessively or place objects on the cord.

Do not use the printer if you find any irregularities as these could result in fire or electrocution.

Keep the printer out of reach of children.

Use only approved accessories and do not try to disassemble or repair the unit by yourself.

Keep the printer away from water and other objects that could penetrate the components.

Please unplug the printer when it is not in use for long periods of time.
