

Thank you very much for purchasing our **FREEWOLF** product, and hope it can bring you brand new operation and feeling. At the same time, we look forward to getting your valuable suggestions on our products, and we will continue to provide you with better products and services.

Quick Start Guide:

- 1 Mode switch Bluetooth/ 2.4G wireless
- 2 Power switch
- 3 Type-c interface
- 4 Caps/ Scr/ Charging, low battery indicator light
- 5 2.4G receiver storage place

Compatible system:

It can run on computer Windows, MACOS, IOS, Android and mobile phone system or computer with Bluetooth version.

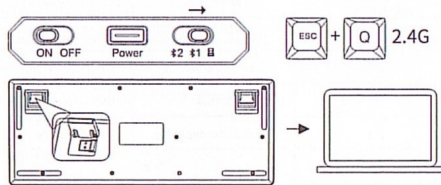

Sleep:

In wireless mode, release the button for 1 minute to enter standby mode, the backlight of the keyboard is off, and it lights up when you press any key; when the key is pressed to wake up the keyboard, the key value must trigger the function. Stand by for 10 minutes to enter sleep; the first key press is invalid and wakes up the keyboard. The second key value is valid.

Battery indicator:

In wireless mode, when the battery voltage is lower than 3.3V, the low-voltage indicator light flashes (low voltage state, the red light flashes to remind, when the charging cable is plugged in, the normal use can be resumed. In the charging state, the blue light is always on. Fully charged status, the blue light is off.

2.4G receiver connection:

2.4G Mode: Insert the dedicated receiver that has been paired, turn the mode switch to the far right turn on the 2.4G mode, and the keyboard can be used normally after pairing is successful. If the keyboard fails to be paired, please long press Esc+Q to pair, and the keyboard can be used normally after pairing is successful.

Bluetooth connection:

Bluetooth Mode: Turn the mode switch to the left, **Esc+Q** to enter the pairing state, open the device that needs to be paired for Bluetooth pairing, and the keyboard can be used normally after pairing is successful.

Tips: The USB port can only be used for charging, and the keyboard cannot be used normally.
