

## Type 1 to Type 2 Plug Adapter User Manual

The adapter is designed for all electric cars that have a type 2 connector and need to use a charging cable with a type 1 connector. The adapter is compact and weighs 500 g, which means convenient handling and easy connection to the car and the charging cable.

### **Safety Precautions:**

This adapter is for indoor use only. Do not use it in wet or damp conditions.

Ensure that both the Type 1 and Type 2 connectors are in good condition before use.

Make sure the power source and the charging station are turned off before connecting or disconnecting the adapter.

Do not modify or alter the adapter in any way.

Keep out of reach of children.

### **Installation:**

Locate your Type 1 electric vehicle charger.

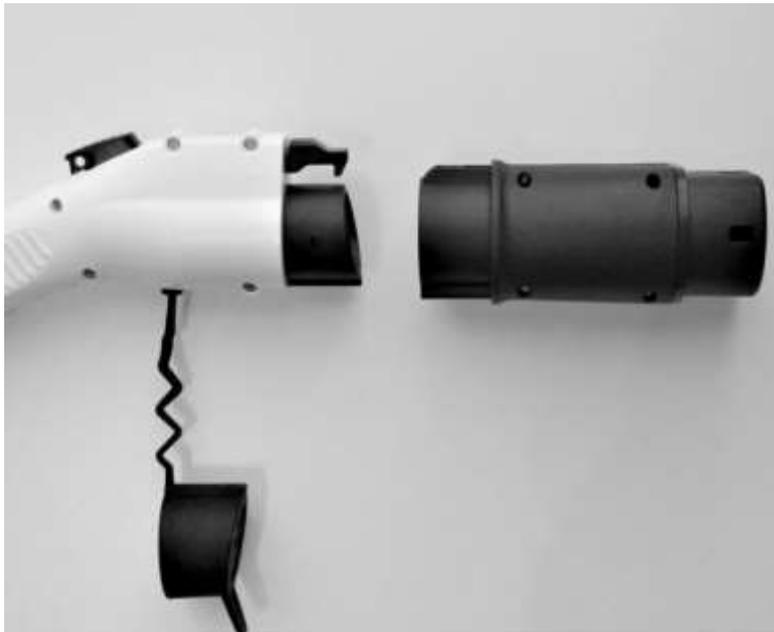

Insert the Type 1 connector of the adapter into your electric vehicle charger cable

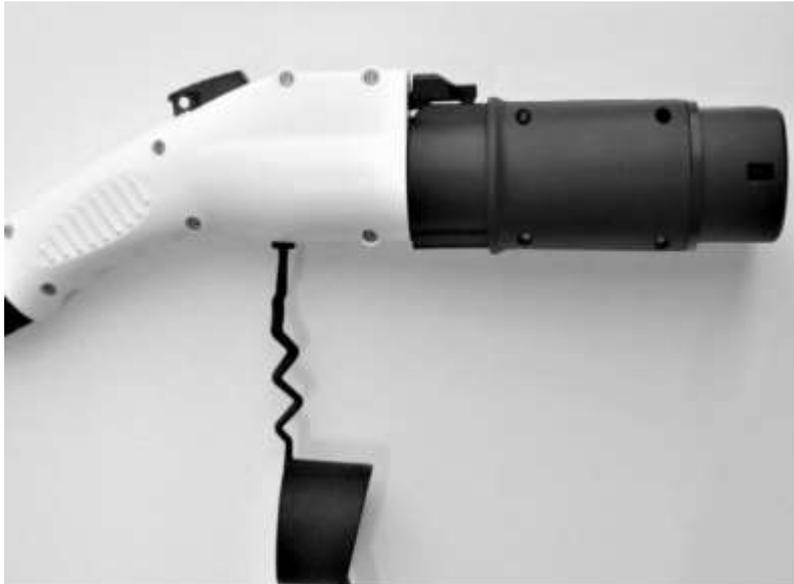

Align the Type 2 connector of the adapter with the Type 2 socket of your EV car

Insert the Type 2 connector of the adapter into Type 2 socket of your EV car

Ensure a secure connection between all connectors.

## Type 1 to Type 2 Adapter

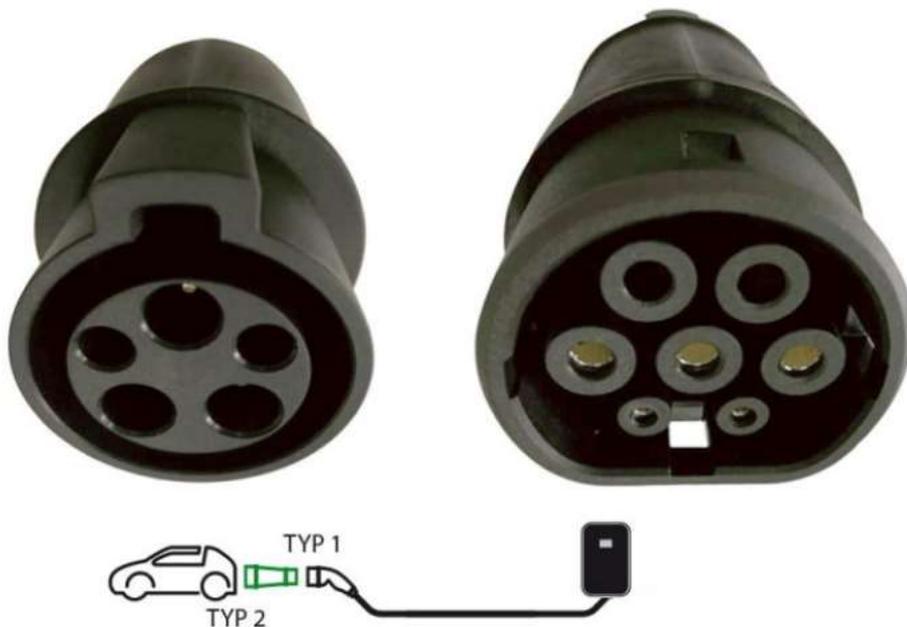

### **Charging:**

Turn on the power source and the charging station.

Follow the instructions provided by your electric vehicle manufacturer for starting the charging process.

Monitor the charging process and follow any safety guidelines provided in your vehicle's manual.

### **Disconnecting:**

Turn off the power source and the charging station.

Carefully disconnect the adapter by pulling on the connectors, not the cords.

Store the adapter in a safe and dry place.

**Maintenance:**

Periodically inspect the adapter for any damage or wear.

Clean the connectors with a dry cloth as needed.

If you notice any damage or malfunction, discontinue use and seek professional assistance.

**Specifications:**
