

...making the entire mouse feel in science and technology while still exuding personality.

ELECTRONIC CAMPAIGN HAND-GOD OPERATION

The optical sensor can quickly track and respond to the opponent's movement data, allowing you to quickly attack and maintain control of the battle situation in intense combat, showcasing precise esports operations.

ERGONOMICALLY COMFORTABLE TO HOLD

With improved rubber anti-slip grips on the side and a bottom that adopts a side-wing design, you can comfortably hold the thumb and mouse during long, intensive gaming sessions to maintain excellent performance.
