

Thank you very much for purchasing our **FREEWOLF** product, and hope it can bring you a new operation and feeling. At the same time, we look forward to getting your valuable suggestions on our products, and we will continue to provide you with better products and services.

Quick Start Guide:

- Mode switch Bluetooth/2.4G wireless
- Power switch
- Type-c interface
- Num/ Caps/ Win Lock Indicator
- 2.4G receiver storage place

Compatible system:

It can run on computer Windows, MAC OS, iOS, Android, Linux and mobile phone system or computer with Bluetooth version.

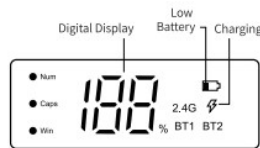

01

Sleep:

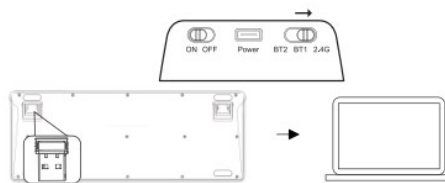

In wireless mode, release the button for 3 minute to enter standby mode, the backlight of the keyboard is off, and it lights up when you press any key; when the key is pressed to wake up the keyboard, the key value must trigger the function. Stand by for 10 minutes to enter sleep; the first key press is invalid and wakes up the keyboard. The second key value is valid.

Battery indicator:

The battery digital display percentage is always on. The corresponding symbol on the digital tube flashes when charging, and stays on when fully charged. When the battery is low, the corresponding symbol on the digital tube flashes to indicate the need for charging.

2.4G receiver connection:

2.4G mode: Insert the dedicated receiver that has been coded, and turn the mode switch to 2.4G mode to use it. If the keyboard receiver is confused or fails to pair successfully, please press and hold **Esc+Q** to pair. The keyboard can be used normally after pairing is successful.

02

Bluetooth connection:

Bluetooth mode: Turn the mode switch to Bluetooth mode, **Esc+Q** to enter the pairing state, open the device that needs to be paired for Bluetooth pairing, and the keyboard can be used normally after the pairing is successful.

Bluetooth name: M96BT1, M96BT2

Tip: The USB port can only be used for charging, and the keyboard cannot be used normally.
