

Polaroid

Pro SLR & Camcorder Microphone PLMICPRO

The Polaroid pro SLR & camcorder microphone features a highly sensitive electret condenser microphone. Being powered by a single three-volt lithium battery (included), the microphone is capable of picking up even soft, low-level sounds at relatively long distances from the camera. It easily slides into the accessory shoe of most camcorders and the flash shoe on most digital-still cameras capable of recording full-motion video files. (The camera must have an external stereo microphone input jack.) It connects to the camera with a single cord with a three-conductor audio plug.

The pickup pattern is cardioid. It is most sensitive to sounds in front of the microphone and very much less sensitive to sounds coming from behind it. Additionally, the microphone incorporates a combination on-off and angle selection switch, plus a battery-level LED warning light.

Features

- Electret condenser technology; sensitive to low volume sources
- Slide shoe mounting with wheel lock
- Cardioid pickup pattern diminishes sound from behind
- Lithium battery provides longer use
- User-selectable pickup angles choose either 90° or 120°
- Battery level monitor keeps you informed at a glance
- Windscreen included; great indoors or out
- Lightweight for less fatigue

Camera Not Included
