General use

1. Take out the power adapter from the box and connect the product to the socket.
2. Press the power button to turn on, and the water tank light will change in 7 colors.
3. Press the light button once to fix the current color, and press the light button again to turn off the light.
4. Press the power button to shut down.

Precautions

1. When dehumidification is not needed, press the power button and unplug the power cord.
2. Do not put the power adapter in a humid place, keep it well ventilated.
3. Remember not to block the air inlet and outlet.
4. Put the product in a horizontal place, don't tilt it to prevent water leakage.

Cleaning

Confirm that the product has been powered off, and unplug the power cord, gently wipe the surface with a soft cloth dust and dirt on the surface and air inlet. If you need to clean the water tank, please take out the water tank and open the water tank cover to clean the water tank.
