Multifunctional airfryer

Save some space in your kitchen cupboards by grilling, baking, and air frying using a single appliance! Using the digital control panel and 4 pre-programmed air fry settings and 4 pre-programmed grill settings, your dinner will be ready on the table with little to no effort.

High performance

Air frying and grilling with the 5.6-litre basket is made possible using 1760 watts of power. This allows for the appliance to reach temperatures up to 265 °C, which you can easily and carefully track using the temperature probe included with the Princess Airfryer Grill.

Low maintenance

Frying without oil provides a healthier lifestyle, but it also makes it a lot easier to clean the appliance after use. Just take out the basket using the cool-touch handle and unplugging the temperature probe to clean them individually. Your Airfryer Grill is ready for use again before you know it!
