

Components Figure

Product	Fruit juicer cup
Bottle capacity	380ml
Motor Model	7.4V
Motor Rotation	No-load:<22000RPM load:<1 5000RPM
Working current	10-18A
Battery capacity	2000mAh
Charging mode	Using mobile phone Charger or powerbank
Charging time	About 3hours
Single working time	40S
Cutter blade material	SUS304
Product material	ABS+AS

Tips

1. Before use, please put some pure water into the cup, and turn it on to wash the cup.
2. Cut the fruit into -1.5cm*1.5cm particles, put the fruit particles into the cup and then pour into some milk or water. Put this machine upside down and turn it on. As soon as the stir core begins to work, turn the machine back, and start to make juice.
3. When the fruit particles are too big to stir, please restart the machine, and you can also shake the machine when it's stirring which will make the juice finer.
4. Before making another taste of juice, please wash the cup first. Just put some pure water into the cup, and turn it on to wash the cup.

Instruction

1. The working principle of this machine is battery drives dc motor to work. Many kinds of smart phones' chargers can be used as this product's charger. Before use, please charge the machine with the cable provided by us. The appropriate charging time is 3h or so.
2. When the machine is working, it is prohibited to open the upper cover, or put hands, or something hard into the cup.
3. Before cleaning, please do make sure the switch is off. Do not put the machine base into water, or the base elements will broke.
4. The machine idle stirring time is 5s. The longest stirring time is 40s. If idle stirring time exceeded 5s or stirring time exceeded 40s, the machine will stop automatically, with the green light flickered. Before restart the machine, please reset the switch first and then turn it on it on. Please do not stir under high strength in order to prevent the electronic elements from loading too much, and to secure its product durability.
5. If the machine stopped suddenly because of the big fruit particles, at such time the line protective procedure starts: switch off automatically and red blue light flickers. After turning off the switch, the light will stop flickering. Turn on the machine, it will work again.
6. The accessories of this machine can't be disinfected by microwave or hot water with heat condition above 50°C, or the accessories will distort.

Usage

Before use, please make sure the battery is full, and the accessories are clean. This product has double safety protection. Only when the cup is put onto the base can the product work.

1. Put in the cut fruits (try to keep the size of the cut fruits at 1.5 * 1.5 to prevent jams)

2. Add appropriate milk or water

3. Tighten the lid and align the red arrow on the cup body with the center of the switch

4. Turn the cup upside down or tilt to separate the fruit from the blade. Click the switch to start normally, then put the cup upright

5. After placing the cup upright, it is best to shake the cup left and right to make the juice better

6. After 40 seconds, you can enjoy delicious juice

Malfunction Analysis and Troubleshooting

malfunction	analysis	troubleshooting
1. unable to start or red light flickered	Battery low	charge
2. green light flickered when it is working	idle stirring exceeds 5s, or loading exceeds 40s	restart
3. red light flickered when it is working	Motor deadlocked	Remove the big fruit particle and restart
4. leaking	Silicon loop installation problem	Re-install the loop
5. the red light and the blue light flash alternately	the magnet is not aligned to the switch	It's sufficient to tighten up the cup.

Friendly Reminden.
