

# Cooling Fan

## Product features

- 1) Three wind speeds are adjustable.
- 2) Third gear cool wind and natural wind modes are optional, when the water tank is short of water, it can automatically switch to natural wind.
- 3) Using ultrasonic atomizer refrigeration, the cooling effect is obvious.
- 4) The upper water tank is fully enclosed ( $\geq 500\text{ml}$ ) design.
- 5) There is a drain pan at the bottom of the product, and the condensed water produced by the cold wind can be collected in the drain pan, and the condensate water can be poured out directly by pulling out the drain pan.
- 6) The whole air outlet is misted, and the fine mist is refrigerated, and it is not easy to get wet for a long time.
- 7) The water tank is equipped with light indicators so that the water level can be seen clearly in a dark environment.
- 8) Adopt whole body waterproof and anti-blocking DC motor.
- 9) The body is small and easy to carry and move.
- 10) When the activated carbon mesh at the air inlet is dirty, it can be manually removed and cleaned with water.
