Safety Instructions

When using electrical appliances, basic safety precautions should always be followed. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience or knowledge. They should be given supervision and instruction in the use of the appliance by a person responsible for their safety. Ensure the appliance is not too close to heat emitting appliances or placed in direct sunlight. Check that the voltage indicated on the data plate corresponds with that of the local network before connecting the appliances to the mains power supply. Do not leave the appliance unattended whilst connected to the mains power supply. Do not immerse the appliance in water or any other liquids. It is imperative to unplug the power cord after the appliance has been used, before it is cleaned and whilst being repaired. Close supervision is required when using this appliance near children.

Never leave the appliance within reach of children. Repairs to electrical appliances should only be performed by qualified personnel. Improper repairs may place the user at serious risk.

This appliance is intended for household use only and should not be used for industrial or commercial purposes.

Do not operate this appliance with a damaged plug or cord, after a malfunction or after being dropped or damaged in any way. Do not use this appliance for anything other than its intended use. This appliance must be placed on a stable, heat resistant surface. Do not push objects into any openings as damage to the appliance

and/or electric shock may occur. Do not use this product in wet or bad weather conditions. This product is not a toy. Do not play music at excessive levels especially near children.

Battery Safety Always...

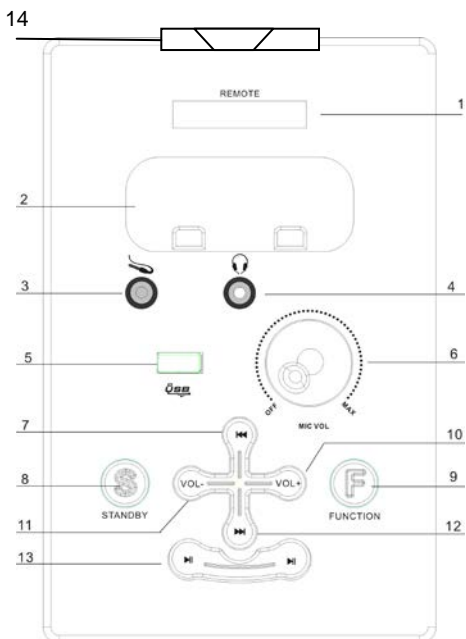

Ensure the battery compartments are secure. Only use the batteries recommended. Ensure correct fit of batteries, observing the plus and minus marks on both the battery and compartment. Replace a full set of batteries at one time. Store unused batteries in their packaging and keep away from metal objects that may cause a short circuit. Remove dead batteries from appliances that will not be used again for a long time. Supervise children with batteries at all times. Remember to keep button cell and AAA batteries away from small children as they can easily be swallowed. Seek medical attention if batteries are swallowed.

Never...

Dispose of batteries in a fire. Attempt to recharge ordinary batteries.
