50 words:

A durable outdoor Bluetooth speaker with a True360 omnidirectional sound. The Beosound Explore's grab-and-go shape, optimised weight, and integrated carabiner clip make it extremely portable. Its unique cylindrical form, together with high-performance drivers and amps, deliver the power and acoustical volume necessary for your listening pleasure while camping or hiking.

100 words:

A durable outdoor Bluetooth speaker with a True360 omnidirectional sound. The Beosound Explore's grab-and-go shape, optimised weight, and integrated carabiner clip make it extremely portable. Its unique cylindrical form, together with high-performance drivers and amps, deliver the power and acoustical volume necessary for your listening pleasure while camping or hiking. Wrapped in a hard anodised aluminium shell, its surface is scratch and corrosion resistant, and the entire speaker is certified fully dust and waterproof. Finally, with up to 27 hours of battery life, the Beosound Explore is ready to go no matter how far off grid your adventures take you.

KEY SELLING POINTS

Superior sound even when outdoors

The cylindrical shape of the Beosound Explore, together with a dedicated DSP algorithm, provide the acoustical volume necessary to ensure uniform sound dispersion patterns across 360 degrees. And equipped with high-performance drivers and amps, this speaker delivers our signature B&O sound quality, even when outdoors.

Designed to take with you

Beosound Explore is meticulously designed so you can take it with you. The grab-and-go shape, along with its optimised weight, fits comfortably in your hand, making it extremely portable. Add a matching, flexible and weather-resistant strap along with a uniquely integrated carabiner clip, and it's ready to go no matter where you're headed.

Durable construction

The durable construction of the Beosound Explore is wrapped in a hard anodised aluminium shell. It has a thicker oxide layer that delivers a tougher scratch and corrosion resistance, and the strengthened internal structure better protects the speaker in the case of drops or falls. In addition, it's certified fully dust and waterproof.

Ready to use wherever you go

No matter how far off the grid your adventures take you, the Beosound Explore will be ready to use with up to 27 hours of battery life. The sturdy TPU bottom casing means you can securely place the speaker on just about any surface. And if the speaker gets wet, dirty or greasy, the reliable push-button interface will work without a hitch.
