

Technical Data Sheet

Product name: Galaxy PLA

Galaxy PLA is a deep metallic coloured PLA range - based on our EasyFil PLA compound - with an incredibly high amount of silver aluminium-flakes added. The high added aluminium-flake content gives a beautiful sparkling, reflecting and glittering finish to Galaxy PLA printed objects.

Due to the high amount of silver aluminium-flakes added to the Galaxy PLA compound you can 3D print beautiful shimmering objects without visible layers and subtle colour shadings and radiance. Even though its high silver-aluminium-flaked content Galaxy PLA is not abrasive to the nozzle of your 3D printer.
