FRONT

Read Manual Carefully Before Use • For maximum protection the helmet must fit properly on the head and the chin strap must be securely fastened in accordance to the instructions. • No helmet can protect against all possible impacts and serious injury or death can occur. • This helmet is designed and constructed to absorb the energy of an impact only once. If an impact occurs, this helmet should be destroyed and replaced. • Do not alter this helmet in any way. Alteration or the presence of paint, stickers or other coverings may reduce the helmet's protective capability. • Inspect helmet frequently for cracks, loose straps or other damage and replace if any are found. • Clean helmet as directed in the instructions. Use only mild soap and water. Harsh cleaning materials may damage the helmet. • Do not use this helmet for more than one year. • Keep helmet away from excessive heat. • Do not paint this helmet. Paint may damage the helmet. • Do not use this helmet for any activity other than bicycling, skateboarding, roller skating or other similar recreational activities. • Do not use this helmet for activities where there is a risk of striking low hanging objects. • Do not use this helmet for activities where there is a risk of being struck by falling objects. • Do not use this helmet for activities where there is a risk of striking hard surfaces such as rocks, trees, motor vehicles, guardrails, curbs, etc. • Do not use this helmet for activities where there is a risk of striking sharp edged objects. • Do not use this helmet for activities where there is a risk of striking fixed objects. • Do not use this helmet for activities where there is a risk of striking moving objects. • Do not use this helmet for activities where there is a risk of striking water. • Do not use this helmet for activities where there is a risk of striking snow. • Do not use this helmet for activities where there is a risk of striking ice. • Do not use this helmet for activities where there is a risk of striking mud. • Do not use this helmet for activities where there is a risk of striking sand. • Do not use this helmet for activities where there is a risk of striking gravel. • Do not use this helmet for activities where there is a risk of striking dirt. • Do not use this helmet for activities where there is a risk of striking grass. • Do not use this helmet for activities where there is a risk of striking pavement. • Do not use this helmet for activities where there is a risk of striking concrete. • Do not use this helmet for activities where there is a risk of striking asphalt. • Do not use this helmet for activities where there is a risk of striking brick. • Do not use this helmet for activities where there is a risk of striking metal. • Do not use this helmet for activities where there is a risk of striking plastic. • Do not use this helmet for activities where there is a risk of striking rubber. • Do not use this helmet for activities where there is a risk of striking fabric. • Do not use this helmet for activities where there is a risk of striking leather. • Do not use this helmet for activities where there is a risk of striking wood. • Do not use this helmet for activities where there is a risk of striking glass. • Do not use this helmet for activities where there is a risk of striking ceramic. • Do not use this helmet for activities where there is a risk of striking stone. • Do not use this helmet for activities where there is a risk of striking concrete. • Do not use this helmet for activities where there is a risk of striking asphalt. • Do not use this helmet for activities where there is a risk of striking brick. • Do not use this helmet for activities where there is a risk of striking metal. • Do not use this helmet for activities where there is a risk of striking plastic. • Do not use this helmet for activities where there is a risk of striking rubber. • Do not use this helmet for activities where there is a risk of striking fabric. • Do not use this helmet for activities where there is a risk of striking leather. • Do not use this helmet for activities where there is a risk of striking wood. • Do not use this helmet for activities where there is a risk of striking glass. • Do not use this helmet for activities where there is a risk of striking ceramic. • Do not use this helmet for activities where there is a risk of striking stone.
