

# Lithium Battery Brightpad Instruction

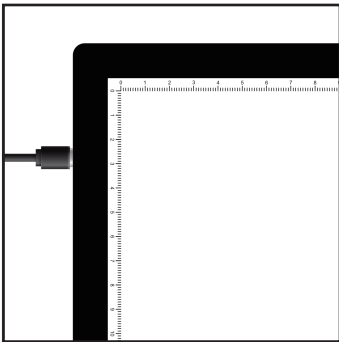

## [Product Brief]

Lithium Battery Brightpad Instruction is a professional tool for making cartoons and animations, mainly composed of acrylic light guide plates and LED light bars. When using, the copy paper and the draft are overlapped together, you can clearly see the picture on the bottom draft, and copy or modify the painting on the first sheet. The animator can be used to draw the decomposition action of the action (middle picture), and the animator can be used to depict the draft as the original. In addition, it is also suitable for beginners to learn and use.

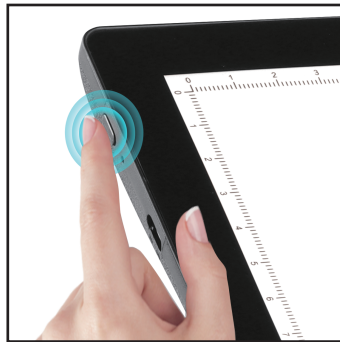

## [Caution]

1. When the brightness of the brightpad is very low, it need to be charged.
2. To ensure that the life of the lithium battery will be longer, the power switch must be turned off when charging.
3. The red indicator light indicates that it is charging, and the blue indicator light is full
4. Under normal circumstances: 5 to 6 hours can be used after charging for 2 hours.

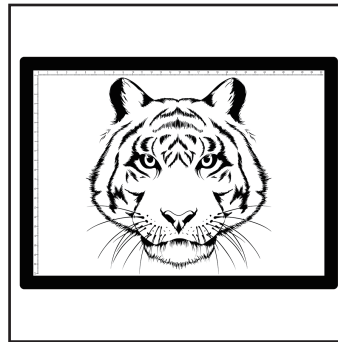

## [Operating instructions]

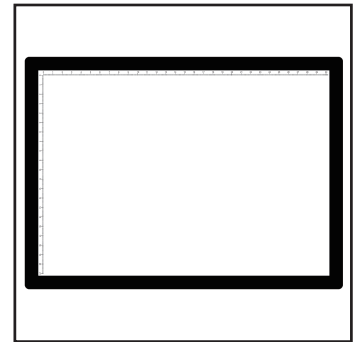

1. Fully charge the Brightpad.

2. After pressing the switch key lightly, the copying station to work. Press the switch again to adjust to the appropriate brightness.

3. After placing the sketch in a fixed area, add copy paper to start sketching

4. Finish drawing, turn off the power.

5 Levles dimming that can be optional, hold down the button to adjust brightness

## [Product parameters]

Product number:	A4-D26	Input voltage:	5V
Product Size:	340X249X18mm	Rated power:	1.88W
Light emitting area:	217X309mm	Color temperature:	3000-6500K
Life time:	390 minutes	Illumination:	400/790/1180/1560/1950LUX
Charging port:	Type-C Port	Battery Capacity:	2500mAh
