

★ *My little host, let me tell you about the functions of buttons on my body.*

★ A. Open the bag on ESSIE's belly, install three No. 7 batteries;

B. Push ON/OFF button to the ON position;

★ Press ON/OFF button: turn on or off light;

★ L1 button: Light flash circularly, own two different flash effects;

★ L2 button: Start up and switch single-color light;

★ L3 button: Start up, switch and close music.

4 built-in songs for sleep;

Built-in four-color high-brightness LED luminous component, eco-friendly and safe;

After start up for one hour, light and music will automatically close, if you still want to see star, please push ON/OFF button again.

Also, if not use for a long time, please take out batteries, and do not discard the used batteries at random, as you know, ESSIE also advocates environmental protection!

### *Words from Little Turtle ESSIE*

Dear little host, thank you for adopting me! my name is ESSIE.

I come to you from the other side of the ocean, I will accompany you to spend every good night.

In the coming days, the fantastic buttons on ESSIE's body will bring you infinite surprise, please try to press them!

However, ESSIE is also afraid of pain and dirt, so please do not bite me or throw me on the ground, let me stay with you and go off to dreamland together with the wonderful music!
