

# 0.5 | INFRARED SECOND | THERMOMETER

The Strex Infrared thermometer is compact, rugged and easy to use. Aim and push the button to read the surface temperature of any non-living object in less than a second. Safely measure surface temperature of hot or cold, hazardous or hard-to-reach objects without contact.

## FEATURES

Easy to use: Infrared technology allows the thermometer to safely measure surface temperatures above boiling and below freezing. Measuring range - 50 °C to + 550 °C without contact. Immediately shows results. Easily switch between Celsius and Fahrenheit.

## MORE REASSURING

The built in laser gives you the precision to hone in on the exact space you want to measure. Operates on a twelve-to-one ratio, 0.95 emissivity, accuracy of +/- 1.5 % and a response time of 500ms

## USER FRIENDLY

Big backlit screen makes it very easy to see the measured temperature. Contains an auto shut-off ability to save battery and a data hold function.

## MULTIFUNCTIONAL

Excellent tool for chefs, mechanics and anyone else who needs to quickly measure the temperature of something without having to physically measure it.

## SPECIFICATIONS

Repeatability: ±1%	°C / °F Selection
Accuracy: 1.5 % or 1.5 °C	Display data hold
Power supply: 1.5V 2x PCS AAA	Auto power off
Distance Spot Ratio: 12:1	Laser target pointer
Emissivity: 0.95 (Adjustable)	Backlight LED display
