SAFE SIZING FOR JUVENILE AND SIDEWALK BICYCLES

It is assumed that the bicycle you have bought is sized correctly for the user. Some parents make the mistake of buying a bicycle too large for the intended rider, planning on the child "growing into" it. There should be a minimum of 1 inch clearance above the highest point of the top tube when the child is ascending the bicycle with both feet on the ground (see drawing below).

WARNING

- Parents/guardians should supervise the child before and during the use of the bicycle.
- Don't ride on busy roads.
- Make sure the child is wearing an approved bicycle helmet when riding.
- Check your child's condition before every ride, make sure that your bike is in safe operating condition.
- There are some risks caused by improper use of the bike. Not allow kid to ride on busy roads.

IMPORTANT

BEFORE YOU OPEN THE PARCEL, PLEASE CHECK AND MAKE SURE THE BICYCLE IS COMPLETE AND NEW. PLEASE CONTACT THE DEALER IF BROKEN.
