Note: If you need to return, please fill in the card and send it back together with the product.

The first installation method

First installation method (first and second)

1. Square the red free glue on the back of the lamp shell.

2. Square about 3 cm, as shown above.

3. Push the patch on the installation of other accessories. If the glue is too thick, it will not adhere smoothly.

4. It is recommended to wait 10 minutes for the glue to dry completely before affixing the lamp shell.

5. Just attach the light to the back shell.

6. Congratulations on completing the installation.

The second installation method

Second installation method (third and fourth)

1. Mark the installation position with a pen and drill hole.

2. Insert the expansion rubber screw and tighten it into the hole.

3. Push the bottom plate with the delivery screw.

4. Attach a bracket for the back of the lamp body.

5. Just attach the light to the back shell.

6. Congratulations on completing the installation.
