

EMS patches
The EMS patches are made of high-quality, skin-friendly material. They are designed to provide a comfortable and effective EMS treatment. The patches are easy to use and can be used on any part of the body.

What is EMS technology?
EMS (Electrical Muscle Stimulation) is a non-invasive treatment that uses electrical impulses to stimulate muscle contractions. This helps to improve muscle tone, reduce muscle pain, and promote overall health and well-being.

What is the purpose of EMS?

Area	Benefit
Neck	Relief of neck pain and tension
Shoulders	Relief of shoulder pain and stiffness
Upper back	Relief of upper back pain and stiffness
Lower back	Relief of lower back pain and stiffness
Legs	Relief of leg pain and stiffness

MAGIC PASTE

The Magic Paste device is designed to provide a targeted EMS treatment to the neck and shoulder area. The device is easy to use and can be used on any part of the body.

Charging voltage: 5V DC
Working voltage: 20mA±10mA
Rated voltage: 3.7V DC
Charging current: 180mA

Precautions

1. Before use, use a wet towel or paper towel to wipe off the stains and oil stains on the massage part, and ensure that there is no trauma on the fitting part.
2. The gel patch should be in even and close contact with the skin when used.
3. If you need to replace the used parts during use, please turn off the machine first and use it.
