

4. Connecting a USB pen or SD card

1. Slide the SD card into the SD slot on top/back of the device.

The SD card will show in the WPD app.
To remove it push on the end of the card.

2. Connect the USB drive to the USB port "USB drive" at the front of the device.

The USB drive will show in the WPD app.

The connected storage source will appear in the app as shown above.

It is possible to connect both (a USB drive + SD card). They will both appear in the app as shown above.

1. Product overview

2.1. Charge your mobile device

Did you know?
 1 x short press = Battery status + USB Charging activate
 5 sec. press = Activate wireless functionalities
 3 sec. press = Power off

* By ideal conditions.

2.2. Charge the device by USB or A/C

3. Connect to WIFI with mobile device

5. Using the iOS APP

Storage overview

BOTTOM MENU

In this overview you can browse and search trough files and folders

Upload files

Tap on [Upload] on the bottom menu. Choose which file you want to upload and choose the destination folder.

Download photo's

Tap on a file for more than 2 sec. A option menu will appear. Choose "Download file"
The picture will appear in the photo-APP of your device.

Download documents

Tap on a file for more than 2 sec. A option menu will appear. Choose "Download file"
The file will appear in the [Download] list (see bottom menu [Downloads])

Tap on the icon "Downloads" in the bottom menu. This is the list of downloaded documents.
These files stay available, even if you Smart Hub is disconnected

Settings

Tap [Settings]. In this menu you can change the Wifi name, set a Wifi password or reboot the device.
Default admin password is "0000"

Settings explanations

[Change SSID and Password] Here you can edit the displayed WiFi access point name (SSID) and/or password

[Change authentication] This changes the Administrator Password

[Restart WPD] This restarts the app & SmartHub

[Default] Restores app & SmartHub to factory defaults

[Upgrade Firmware] This upgrades the SmartHub firmware. Make sure the SmartHub is connected to the internet (Either by Wifi or LAN)

[Wifi Bridge] This lets you connect your SmartHub to an available Wifi Network, while your device is still connected to the SmartHub. Once enabled and connected, you can be connected to your SmartHub and another WiFi Access Point (with Internet Access), to be able to surf & store.

[Auto Wifi bridge] When you turn this option on, the SmartHub automatically connects to open or known WiFi networks

Extra functions

Connect to the Internet using the SmartHub

You have two options for connecting the SmartHub to the Internet:

a. Connect to an existing, internet enabled LAN Network
1. Connect a LAN cable to your existing LAN network and the Ethernet-Port of the SmartHub
2. It will connect automatically. You can check the connection status by clicking the Wireless Bridge Icon

b. Connect the SmartHub to a secondary, internet enabled, WiFi Access Point
1. Check Settings [WiFi Bridge]

Auto Backup

1. The Storage Menu automatically appears from the left when a device is connected. When it does not appear, swipe right from the app home screen.

In this menu you see three options:

[Photo] this captures all images from your android device and backs it up to storage media connected to the SmartHub

[Contacts] this backs up all your contact data in a contacts-file on your storage media connected to the SmartHub

[ON/OFF] This turns automatic backup on or off

6. Using the web-interface

Storage overview

For access via browser, connect with wifi (see chapter 3) and type 192.168.1.2 in the URL field of your browser.

Upload files

This is a APP only feature.

Download photo's

Click on the arrow and click "Download file"
The picture will open in a new tab/window of your browser. Right-click and choose "Save picture as"
*This can be different in some browsers

Download documents

Click on the arrow and click "Download file"
The file will start downloading in your browser".
*This can be different in some browsers

Settings

Tap "Settings". In this menu you can change the Wifi name, set a Wifi password or reboot the device.
Default admin password is "0000"

7. Using the Android APP

Main screen

Device is connected

- a. Folder options:
- [Open] Opens folder
 - [Move to...] Moves folder to another folder on storage media
 - [Rename] Renames folder
 - [Delete] Deletes folder
 - [Details] Shows folder details
- b. File options:
- [Download] Downloads file to WPD App folder
 - [Download to...] Downloads file to local Android device's storage (See D.)
 - [Move to...] Moves file to another folder on storage media
 - [Rename] Renames file
 - [Delete] Deletes file

Extra functions

Connect to the Internet using the SmartHub

You have two options for connecting the SmartHub to the Internet:

- a. Connect to an existing, internet enabled LAN Network:
1. Connect a LAN cable to your existing LAN network and the Ethernet-Port of the SmartHub
 2. It will connect automatically. You can check the connection status by clicking the Wireless Bridge Icon

- b. Connect the SmartHub to a secondary, internet enabled, WIFI Access Point
1. Check Settings [WIFI Bridge]

Differential* Backup

1. The Storage Menu automatically appears from the left when a device is connected. When it does not appear, swipe right from the app home screen.

In this menu you see three options:

[Photo] this captures all images from your android device and backs it up to storage media connected to the SmartHub
 [Contacts] this backs up all your contact data in a *.VCF file on your storage media connected to the SmartHub
 [ON/OFF] This turns automatic backup on or off

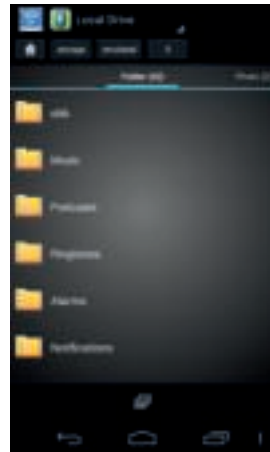

*Differential means that only the changes in your Android device are backed up when a second backup is made or automatic backup is switched on.
