Note:

- N.D. = Not Detected or less than MDL
- MDL = Method Detection Limit
- % = Percentage by weight
- -0.1% = 1000 mg/kg, mg/kg = ppm
- The results less than MDL are not taken into account while calculating the sum contents.
- Sample (8) was tested by semi-product due to insufficient finished sample size according to the applicant's request, The applicant will undertake all differences and risk.
- "+" Mixed, The admixture of specimen is tested as a whole(part) which according to the applicant's request, the result of report as average value because of the whole specimen is regarded as constituting from the homogeneous material. If the testing of specimen may have the obvious difference, and the result may exceed the number in this report. The applicant will undertake all differences and risk.

No.	Grading*	Results
1	0	Pass
2	0	Pass

Note:

- *=Requirement

As a requirement of observation, migration of coloring matter shall not be recognized Provided, however, when the test solution is prepared from textile sample, the toy is regarded as conforming to the requirement if the color obtained from such migration is not deeper than the color of the comparison standard solution. (For the toy intended for children over 3 years of age, it is regarded as conforming to this requirement if the color obtained form such migration is not deeper than the color of the solution which is three times as dense in concentration as the comparison standard solution)
