Soothers and caps are suitable for all commonly used forms of

soother, your child may be strangled by them. Inspect carefully before each

sterilisation. Wash your hands thoroughly and ensure surfaces are clean

before contact with sterilised components. Night Time soothers – expose

each surface to light before use. The soother can be cleaned by washing with

warm water. DO NOT use abrasive cleaning agents or anti-bacterial

cleaners on the soothers. Excessive combinations of detergents may

eventually cause plastic components to crack. Should this occur, replace

the teat. Keep the removable protection (cap) for the teat away from

sunlight or near a source of heat, or leave in disinfectant

("sterilising solution") for longer than recommended, as this may weaken

the teat. Never dip teat in hot water for longer than recommended, as this may

eventually cause plastic components to crack. Should this occur, replace

the teat. Keep the removable protection (cap) for the teat away from

sunlight or near a source of heat, or leave in disinfectant

("sterilising solution") for longer than recommended, as this may weaken

the teat. Never dip teat in hot water for longer than recommended, as this may

eventually cause plastic components to crack. Should this occur, replace

the teat. Keep the removable protection (cap) for the teat away from

sunlight or near a source of heat, or leave in disinfectant

Per la sicurezza del vostro bambino AVVERTENZA! Non fissare il succhietto a nastri o cordini, il vostro bambino potrebbe strangolarsi. Controllare attentamente dopo ogni uso, specialmente quando il bambino ha i denti. Tirare il succhietto in tutte le direzioni. Sostituirlo al primo segno di usura o danneggiamento. Non lasciate il succhietto esposto alla luce diretta del sole, vicino a una fonte di calore o immerso nel liquido disinfettante ("soluzione di sterilizzazione") più a lungo di quanto consigliato, poiché la tettarella potrebbe deteriorarsi. Conservate la protezione rimovibile della tettarella (tappo) lontano dai bambini per evitare il soffocamento. Al primo utilizzo, ponete il succhietto in acqua bollente per 5 minuti, lasciate raffreddare ed eliminate l'acqua in eccesso. Ciò garantisce l'igiene. Pulite il succhietto prima dell'uso. Non immergete mai la tettarella in sostanze dolci o in medicinali, poiché potrebbero provocare carie. Per motivi igienici e di sicurezza, sostituite il succhietto dopo 4 settimane di utilizzo. Nel caso in cui il succhietto venisse messo interamente in bocca dal bambino, MANTENERE LA CALMA: Estrarlo dalla bocca del bimbo con la massima attenzione. Il prodotto deve essere utilizzato sempre sotto la supervisione. Tenetelo in un contenitore asciutto e chiuso. I succhietti devono essere sterilizzati secondo le procedure più comuni. Pulite accuratamente le mani e assicuratevi che le superfici in contatto con il bambino siano pulite. Succhietti per neonati: dopo l'uso esponete le impugnature alla luce. Il succhietto deve essere lavato con acqua calda. NON pulite il succhietto con detergenti abrasivi o antibatterici. L'utilizzo eccessivo di detergenti di vario tipo può causare la rottura delle parti in plastica. Se si verifica tale evenienza, sostituite immediatamente il succhietto. NON sterilizzate la ciotola. seguridad de su bebé ;ADVERTENCIA! Nunca sujetar cintas
resistir dichas circunstancias. Extráigalo de la boca con el mayor cuidado
possible. Utilice siempre este producto bajo la supervisión de un adulto.
Guárdelo en un recipiente cerrado y seco. Los chupetes y las tapas son aptos
para todas las formas de esterilización. Lávese bien las manos y asegúrese
de que las superficies estén limpias antes de que entren en contacto con los
componentes esterilizados. En el caso de los chupetes nocturnos, exponga
las anillas a la luz antes de usarlos. Se puede limpiar el chupete lavándolo
con agua caliente. NO utilice agentes de limpieza abrasivos ni limpiadores
antibacterias con los chupetes. La excesiva combinación de los detergentes
puede provocar que los componentes de plástico se agrieten. Si ocurriera
esto, sustituya el chupete de inmediato. NO esterilice la caja exterior.
