SINJI

INFRARED LEG HEATER

The Sinji Infrared Leg Heater is designed to provide a safe and effective way to warm up your legs. It features a foldable design for easy storage and a compact size that fits under most desks. The device is made of 75% neoprene and 25% polyester, which helps to retain heat and prevent it from escaping. It has three heat settings (high, medium, low) and a timer function that turns off the device after 3 hours. The device also includes a built-in timer and a power cord that is 1.5 meters long. It is perfect for warming up your legs after a long day at work or after a workout. The device is also foldable, making it easy to store away when not in use.
