

Vacuum operation instructions for fresh-keeping caps and cans removal:

1. Put the food into a preservation jar or corresponding container and cover it.
2. Place the outer suction pipe joint on the preservation cover, and connect the other end of the outer suction pipe to the machine's exhaust port.
3. After ensuring that the container is sealed, press the "point pumping button" to vacuum.
4. After vacuuming, remove the outer suction tube and complete the operation.

Attention: Please remove the lid when beating the preservation jar in the microwave. Please gently pull up the exhaust and let it cool for a few seconds when deflating. It can be used with a refrigerator for better preservation effect.
