1

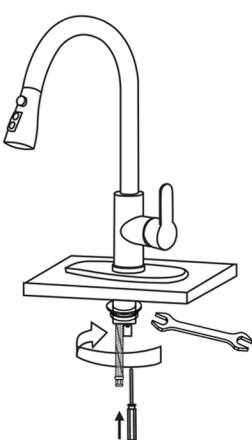

Retirez les anneaux du robinet

2

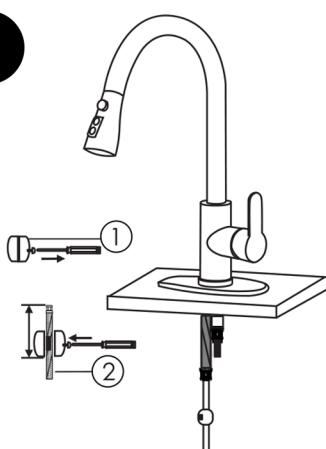

Placez le robinet à l'endroit souhaité

3

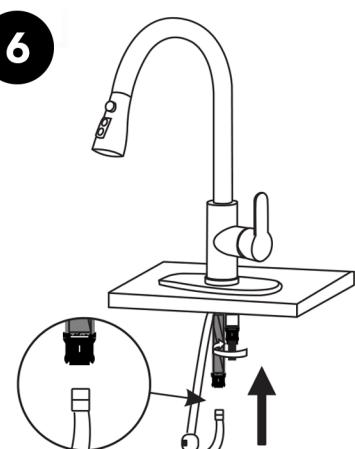

Remettez les bagues sur le robinet après l'installation du robinet

4

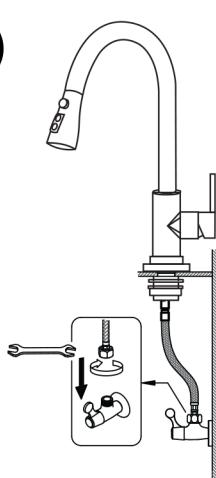

Assurez-vous que toutes les vis sont serrées à l'aide d'un tournevis pour que le robinet reste bien en place

5

Fixez ensuite la boule de gravité au tuyau de raccordement

6

Plus tard
Connectez maintenant le tuyau de raccordement au nouveau robinet. Assurez-vous qu'il est bien serré et sécurisé

7

Assurez-vous que les deux tuyaux sont correctement raccordés à l'eau chaude et à l'eau froide, puis serrez-les fermement
